

Apex Flight Hub — User Manual

Oct 8, 2026 · @Riaan Struwig

1. Getting started

The Apex Flight Hub is Apex Adventures' online training folio, logbook and licence record for students, pilots, instructors and office staff. It runs in any web browser on a computer, tablet or phone at **apex-portal-production.up.railway.app**.

Account types

Account	Who	Lands on	Main jobs
Student	Anyone training with Apex (PG, PPG and/or PPT)	My Portfolio	Follow training, write exams, read study notes, log flights
Pilot	Licensed pilots and club members	My Portfolio	Self-signed logbook, ratings ladder, licence and renewal record
Instructor	Apex instructors added by the CFI	Students	Sign off exercises, countersign student flights
CFI (Chief Flight Instructor)	The school's CFI	Students	Everything an instructor does, plus syllabus, exams, study material, settings and approvals
Admin (Office Manager)	Office staff	Verification queue	Approve sign-ups, manage student and pilot profiles, forms, password resets

A CFI or instructor can also have their own pilot profile; they reach it from **My Portfolio** in their menu.

Signing up (students and pilots)

1. On the login page click **Sign up**.

2. Under **I'm signing up as a...** choose Student or Pilot. Students tick one, two or all three training types (PG, PPG, PPT).
3. Fill in personal details, contact details and next of kin. Required fields are marked.
4. Upload a copy of your ID or passport. A profile picture and signature are optional. Pilots also upload their current CAA licence and give its expiry date and first-issue date.
5. Students who started training before the Hub may enter their **Initial student sign-up date**. Leave it blank if you're new.
6. Read the Client Consent Form and the Indemnity, then sign each by typing your full name.
7. Click submit. You'll see **Application submitted**.

You can't log in until a CFI or Admin approves the application. When they do, you get a WhatsApp saying you can now log in.

Joining by invite

The CFI can also create your account and send you an invite link (or a WhatsApp invite). Open the link, choose a password, and you're in.

Logging in

Enter your email and password on the login page. A message tells you if your application is still pending, was declined, or the account is suspended.

Forgotten password

1. On the login page click **Forgot your password?** and enter your email.
2. Open the email and click the reset link. It works for 1 hour.
3. Choose a new password.

If the email doesn't arrive, the request also appears on the CFI's and Admin's **Password resets** page, and they can reset it for you.

Finding your way around

The menu across the top changes with your account type. Red numbers on a menu item (for example **Verification queue 3**) show items waiting for you. The small grey line under the menu shows the Hub's version and when it was last updated.

2. Students

Students see only the training, exams and study notes for the training types they signed up for (PG, PPG and/or PPT). Menu: **My Portfolio** · **Training folio** · **Logbook** · **Forms & procedures** · **Study Notes**.

Before you start: consent and medical

If your Client Consent or Indemnity isn't signed yet, the Hub asks you to sign before anything else (**Sign & continue**). Your medical declaration is valid for 12 months; when it runs out, sign a new one from your profile with **Sign & save declaration**.

My Portfolio (dashboard)

- **Header:** your name, the training you're doing, how many exercises are signed off, and your **Initial student sign-up date**.
- **Details line:** SACAA No., SAHPA No., SAHPA expiry date (red when expired), Apex No. and Call Sign. Ask the CFI or office to correct these; students can't edit them.
- **Flight summary:** total flights, flight time and launches.
- **Exams:** one row per exam you can take, each with its study note beside it (see below).
- **Progress:** your training sections in phase order with how far you are.
- An **orange notice bar** at the top, when shown, is a message from the CFI. Its button opens a document or link.
- The standard radio call is shown at the bottom of the page.

Training folio

Your full syllabus, in this order: Phase 1, Phase 2, Phase 3, then Conversion and Practical Theory. Each exercise shows **Not started**, **In progress** or **Signed off**. A section opens once every exercise in the section before it is signed off. An **i** button next to an exercise opens notes, pictures, documents or videos the CFI added for it.

Exams

Your training	Exams you see
PG	Basic Licence (PG)
PPG	Basic Licence (PG), PPG, DTO Radio

Your training	Exams you see
PPT	Basic Licence (PG), PPT (under construction), DTO Radio

If you do more than one training type you see all of their exams.

- **Writing online:** open the exam and answer every question, then submit. Some exams have a timer (Radio 60 minutes, PPG 90 minutes); when time runs out, your answers are submitted automatically. Some sections must be passed in full (for example Air Law). Your result is final once the CFI verifies it.
- **Retakes:** after a verified fail you can start a new attempt. The Radio exam has a 7-day wait after a fail.
- **Already wrote it on paper?** Click **Already wrote this on paper? Submit it →**, upload a photo or scan of the completed paper, and click **Submit for review**.
- **Already have a radio licence?** Click **Already hold a radio licence? Submit it →** and upload your SACAA radio licence.
- Paper submissions show **awaiting review** until the CFI or Admin marks them pass or fail.

Study Notes

The **Study Notes** page lists all the study material for your exams: slide decks, notes, documents or links. The most important note for each exam also sits beside that exam on your dashboard.

Logbook

1. Open **Logbook** and fill in the flight: date, take-off site, wing/equipment, flight type, times and the exercises covered.
2. Save. The flight shows as pending until an instructor or the CFI countersigns it.
3. To add many flights at once, use the CSV or Excel import on the same page.

Your totals are added up automatically. Only staff can change a flight once it's countersigned.

Forms & procedures

Download Apex forms and procedures from this page.

Profile and documents

- **Edit profile** (top right, under your name): update contact details, next of kin and uploads. Each uploaded document has a **View** button.
- **Proof of payment**: upload your proof of payment for training. Not paid yet? Click **Request an invoice** and the office will contact you.
- **Print portfolio**: a printable summary of your details, flights and progress (use the browser's print or Save as PDF).

3. Pilots

Pilots keep their own self-signed logbook and a record of their licence, ratings and renewals. Menu: **My Portfolio · Logbook · Forms & procedures**.

My Portfolio (dashboard)

- **Details line**: SACAA No., SAHPA No., Apex No. and Call Sign, with your flight summary (flights and hours, last 12 or 24 months).
- **Ratings ladder**: your PG, PPG and PPT tiers (Basic, Intermediate, Sport, Tandem). Each held tier shows the date you've held it since. When you've held a tier long enough to be eligible for the next one (CAR Part 106 time-in-rank), the ladder shows **Eligible now** with an **Apply** button.
- **Verified licences & endorsements**: everything the CFI or Admin has confirmed.
- **Pending review**: what you've applied for that hasn't been checked yet.
- **Declined**: an application the CFI or Admin turned down, with their reason and a **Re-apply** button. A red **Action needed** note at the top tells you when something was declined.
- **Apply for something else**: hold a rating that isn't listed (for example Intermediate, Sport or Tandem on another equipment type)? Apply here and it goes to the CFI or Admin to verify.

Logbook (self-signed)

1. Open **Logbook** and log the flight: date, site, equipment, times and the **Flight Task** (Solo, XC, Tandem, TFI, Skill test, Renewal, Equipment test, Display).
2. Save. Your own flights are self-signed straight away; no instructor countersign is needed.

3. You can **Edit** or **Delete** your own flights, and import many at once from a CSV or Excel file.

Flights you logged before joining (paper logbook) can be added as a starting total on your profile so your totals are complete.

Licence and renewal

- Your profile holds your current CAA licence (upload), its **expiry date** and the date it was **first issued**.
- **Renewing:** when you get your renewed licence, open **Edit profile**, upload the new licence and enter the new expiry date. It's flagged for the CFI or Admin to review.
- **Expired licence:** if your licence has expired, the Hub shows **Your flying licence has expired** and locks the portfolio until you submit your renewed licence for review.

Profile

Edit profile updates contact details, next of kin, documents and licence details. Each upload has a **View** button. **Print portfolio** gives a printable summary.

Instructors and the CFI as pilots

A CFI or instructor with their own pilot profile opens it from **My Portfolio** in their menu, and goes back with **Back to Instructor**.
