PPT (Paratrike) Basic Licence — Requirements and Documents

Apex Adventures (Paramotor SA (Pty) Ltd, SACAA DTO 0012) · Paratrike (PPT) only, based on the PPG Basic licence · Compiled 26 Oct 2026 from CAR Part 62 Subpart 8, SA-CATS 62 Appendices R62.35 / R62.37, the SAHPA Training and Procedures Manual (TPM) and SAHPA's 2025 forms.

1. Who this is for

Pilots who want to fly a **paratrike (wheeled powered paraglider)** solo. SAHPA treats a paratrike as a powered paraglider with a tricycle undercarriage, and trike training is a conversion from PPG. The Basic requirements below are therefore the PPG Basic requirements plus the paratrike conversion. No separate PPT Basic figures were found, so confirm with SAHPA before publishing.

2. Before you start

- PG Basic completed and PPG training under way or completed (PPG Basic requirements in section 3)
- Registered with SAHPA as a student; copy of ID or passport on file
- Medical fitness declaration (SAHPA Medical Fitness form)
- Restricted radiotelephony operator's certificate
- Theory exams passed, then the skills test within 90 days of the exam and within 60 days before you apply (CAR 62.08.5)

3. Experience requirements (PPG Basic, SA-CATS R62.35)

Requirement	Basic
PG Basic licence	Completed first
High flights	35 high flights of at least 60 seconds each
PPG flights	10 flights of at least 60 seconds
Airtime on PPG	At least 4 hours (3 hours for a conversion course, TPM)
Landings	5 safe power-on landings within 5 m of a target and 5 safe power-off landings within 7 m, into wind

Confirm with your instructor whether trike flights count towards the PPG flights and hours, or whether flights on a foot-launched PPG are also required.

4. Paratrike conversion (SAHPA TPM 5.12)

You must show that you can:

- Assess conditions for a safe trike launch (weather, field, wing weight range and rating)
- Pre-flight the trike and canopy: motor/trike connection, canopy layout, avoiding wheel and line entanglement
- Centre the canopy overhead mainly with the brake toggles and minimal nose-wheel steering
- Use power to keep the canopy pressurised during launch
- Complete 5 successful no-wind launches
- Understand and control the higher approach speed caused by greater wing loading
- Flare correctly timed on landing
- Complete 5 successful landings with proper canopy control and deflation

Tandem flights are only allowed after a tandem rating.

Equipment: paramotor/trike with protective cage and harness; a wing approved under SAHPA rules; air-band radio and headset where aviation rules require one (any flight above 1500 ft AGL, within 10 nm of an active airfield or controlled airspace, or along a known traffic route); an altimeter, vario or GPS to monitor height and climb rate. Boots with ankle support and a reserve parachute are recommended, not compulsory.

5. Theory exams

- Pass both the PG and PPG written exams (TPM), **pass mark 85%** (SA-CATS R62.37)
- Subjects: General, Airflow, Aerodynamics, Flight Control, Air Rules, Airmanship, and others pertaining to powered flight

6. Practical / skills test

All tasks in SA-CATS-FCL 62.08.5.1, flown on the paratrike, plus the PPG Basic items: pre-flight of canopy, hang-point and motor; site analysis and engine-out planning; at least two ways to shut the motor off; 3 of the last 4 forward inflations and 3 of the last 4 reverse inflations with launch; two minutes of controlled kiting; co-ordinated 90, 180 and 360 degree turns; and the landing standards in section 3.

7. Documents to submit

#	Document	Notes
1	SAHPA membership application form	Completed and signed by the pilot and a Grade A or B instructor
2	Medical Fitness form	Per SA-CATS
3	Marked and passed PG and PPG written exams	85% or higher
4	Restricted radiotelephony operator's certificate	Copy
5	Training Proficiency Card and Practical Requirements Card	Completed and signed
6	Basic Licence Theory Checklist	Completed and signed
7	Logbook copy	Signed by a Grade A or B instructor; paratrike conversion flights and landings clearly shown
8	Logbook endorsement for the paratrike conversion	Signed by your instructor
9	CA 62.16 application form	From SAHPA Forms & Checklists. Flights and hours must match your logbook
10	CA 62.15 skills test form	Completed and signed after the skills test, flown on the paratrike
11	CA 183-540 consent form	Signed
12	Certified copy of ID or passport, and 2 colour ID photographs	Follow SAHPA's ID & Passport Specifications sheet
13	Membership and licence fees with proof of payment	Current SAHPA fee schedule

8. Steps

1. Complete PG Basic and the PPG Basic requirements.

2. Complete the paratrike conversion and get the logbook endorsement.
3. Pass the PG and PPG exams (85%).
4. Fly the skills test on the paratrike within 90 days of the exam.
5. Your instructor signs the cards, checklist and logbook.
6. Submit the documents above to SAHPA within 60 days of the skills test.
7. SAHPA submits to SACAA; upload your SACAA licence in the Flight Hub when it is issued.

9. Source notes

- CAR Part 62 Subpart 8; SA-CATS 62 Appendices R62.35 (item 1(ii), PPG Basic) and R62.37; SAHPA TPM Part 5 (5.10 and 5.12); SAHPA Forms & Checklists page (2025 packs).
- SAHPA's own manuals use "PPT" for both powered parachutes and paratrikes. This sheet covers the wheeled paratrike only. The powered parachute (PPC) Basic licence is different: 3 hours of dual training and 7 hours of solo flight after the PG Basic requirements.
- Part 106 (Hang-gliding and Paragliding) was published as a draft for comment in May 2022; its final status was not confirmed.
- SA-CATS 62 Appendix R62.38 (skills test requirements) was not read in full. No Basic figures specific to paratrikes were found.
