PPT (Paratrike) Tandem Rating — Requirements and Documents

Apex Adventures (Paramotor SA (Pty) Ltd, SACAA DTO 0012) · Paratrike (PPT) tandem, based on the PPG tandem rating · Compiled 26 Oct 2026 from CAR Part 62 Subpart 8, SA-CATS 62 Appendices R62.35 / R62.37, the SAHPA Training and Procedures Manual (TPM) and SAHPA's 2025 forms.

1. Who this is for

PPG pilots who want to fly a passenger on a **tandem paratrike**. SAHPA's manual allows tandem flights on a paratrike only after a tandem rating has been obtained, and treats the paratrike as a powered paraglider with a tricycle undercarriage. The requirements below are therefore the PPG tandem requirements, flown on a trike after the paratrike conversion. No separate paratrike tandem figures were found, so confirm with SAHPA before publishing.

2. Before you start

- A valid PPG licence, held for at least 24 months, at Sport class (CAR 62.08.1(4))
- The paratrike conversion completed and endorsed in your logbook (TPM 5.12)
- No incidents in the prior 6 months displaying negligence or incompetence
- Class 4 medical declaration signed by a medical practitioner
- Level 1 First Aid certificate

3. Experience requirements (PPG tandem, SA-CATS R62.35 and TPM 5.11)

Requirement	Figure
PPG flights after licensing	At least 150 PPG flights following your initial licensing
High flights and airtime	At least 300 high flights and 150 hours airtime
Training with an instructor	At least 10 flights with a tandem-rated Grade B instructor or higher, at least one of them as passenger
Long flights	2 flights of more than 30 minutes
Altitude	Flown at inland sites above 1200 m ASL and at sea level
Passenger weights	Flown as pilot in command with two tandem-rated pilots of different weights

Confirm with SAHPA whether the instructor flights and tandem tests must be flown on a paratrike, and whether trike flights count towards the 150 PPG flights.

4. Paratrike conversion (SAHPA TPM 5.12)

Before the tandem course, you must show that you can: assess conditions for a safe trike launch; pre-flight the trike and canopy (motor/trike connection, canopy layout, wheel and line entanglement); centre the canopy overhead mainly with the brake toggles and minimal nose-wheel steering; use power to keep the canopy pressurised during launch; complete 5 successful no-wind launches; control the higher approach speed caused by greater wing loading; flare correctly timed on landing; and complete 5 successful landings with proper canopy control and deflation.

5. Theory exam

- Tandem PPG licence exam, **pass mark 85%** (SA-CATS R62.37)
- Subjects: General Knowledge and Air Law, Paraglider Structure and Aerodynamics, Navigation and Airspace, Flying Skills and Airmanship, Meteorology and Airflow, Aeromedical, and others pertaining to PPG

6. Practical / skills test

All tasks in SA-CATS-FCL 62.08.5.3, plus the manoeuvres in the SAHPA Manual of Procedures and the Tandem tests, flown on the paratrike. Assess conditions for safe launch. Show good attitude to airmanship.

Equipment: a tandem-certified wing, and a tandem-rated reserve parachute carried on all tandem flights above 500 ft AGL. Air-band radio and headset where aviation rules require them.

7. Documents to submit

#	Document	Notes
1	Tandem rating application checklist	Signed by the training instructor. Ask SAHPA which tandem pack applies to a paratrike

#	Document	Notes
2	Marked and passed Tandem exam	85% or higher
3	Logbook endorsement for the paratrike conversion	Signed by your instructor
4	Class 4 medical declaration	Signed by a medical practitioner
5	Level 1 First Aid certificate	Valid
6	Logbook copy	PPG flights, the 10 instructor flights, the 30-minute flights and the two sites shown
7	CA 62.16 application form	From SAHPA Forms & Checklists
8	CA 62.15 skills test form	Completed and signed
9	CA 183-540 consent form	Signed
10	Certified copy of ID or passport, and passport photo	Follow SAHPA's ID & Passport Specifications sheet
11	Licence application fee with proof of payment	Current SAHPA fee schedule

8. Steps

1. Confirm your PPG licence, 24 months and Sport class.
2. Complete the paratrike conversion and get the logbook endorsement.
3. Log 150 PPG flights after licensing, plus the 300 high flights and 150 hours.
4. Fly your 10 instructor flights and the other requirements in section 3.
5. Pass the Tandem exam (85%) and complete the practical tests.
6. Your instructor signs the checklist and logbook; submit the documents to SAHPA for the Committee.
7. Upload your SACAA tandem rating in the Flight Hub when it is issued.

9. Source notes

- CAR Part 62 Subpart 8 (62.08.1(4)); SA-CATS 62 Appendices R62.35 (item 3(ii)) and R62.37; SAHPA TPM Part 5 (5.11 and 5.12); SAHPA Forms & Checklists page (2025 packs).
- SAHPA's own manuals use "PPT" for both powered parachutes and paratrikes. This sheet covers the wheeled paratrike only. The powered parachute (PPC) tandem rating is different: 30 hours of PPC flight as pilot in command after initial licensing and 70 flights (R62.35 item 3(iii)).
- Part 106 (Hang-gliding and Paragliding) was published as a draft for comment in May 2022; its final status was not confirmed.
- SA-CATS 62 Appendix R62.38 was not read in full. No tandem figures specific to paratrikes were found.
