> The Hub is at **apex-portal-production.up.railway.app**. Screenshots use a test account with made-up names; your own screens show your details and your school's syllabus.

Welcome

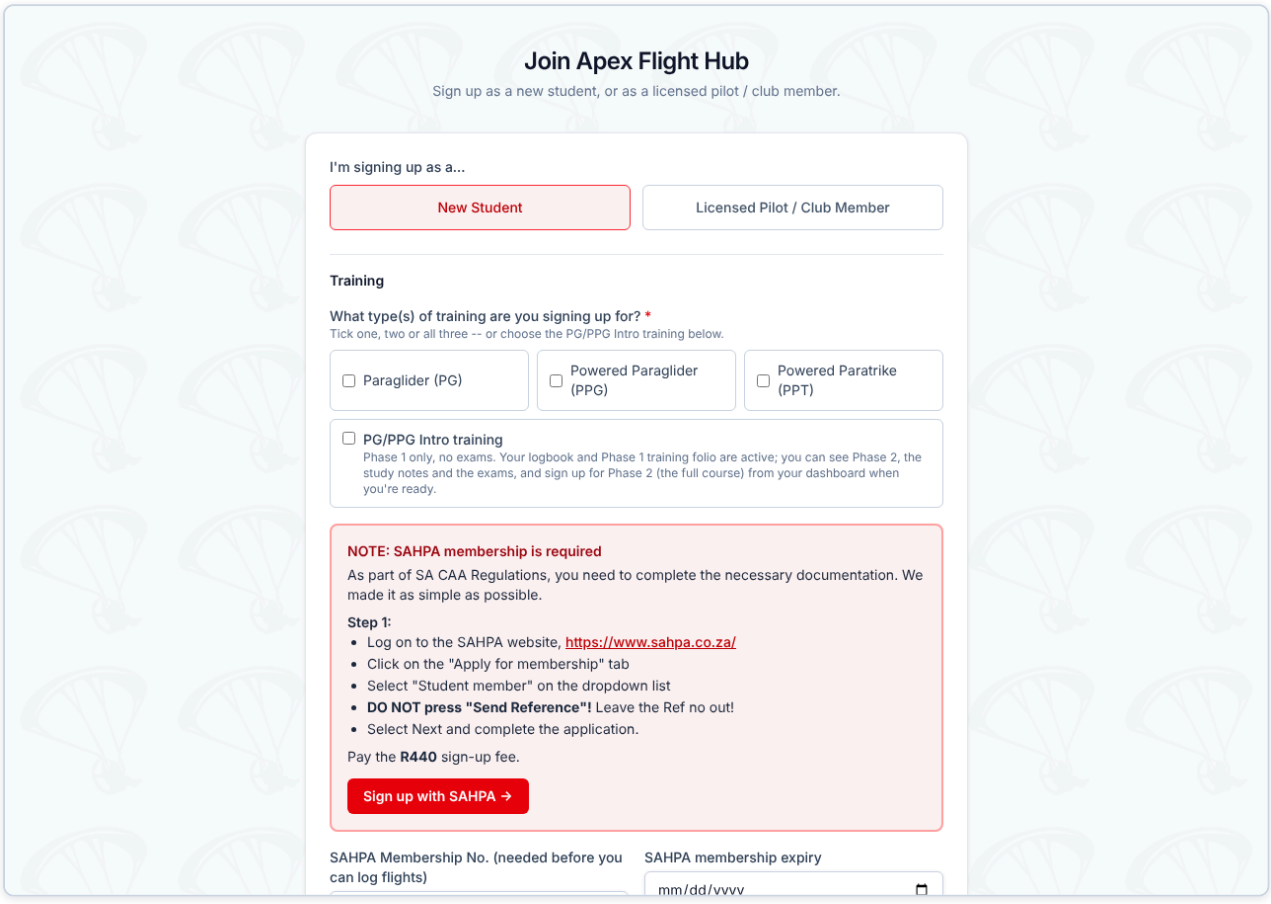

The Apex Flight Hub is where an Apex Adventures student keeps everything about their training. That covers the logbook, the training folio, exams, study notes and documents, from sign-up to Solo wings. After that it becomes the pilot's licence and ratings portfolio.

- **Open it:** go to **apex-portal-production.up.railway.app** in any browser, on a phone or a computer. There is nothing to install.
- **Who this guide is for:** students (new or already training), and pilots after sign-off. Instructors and the CFI have the full user manual.
- **The screenshots** come from a test account with made-up names. Your own screens show your details and your school's syllabus.
- **Questions:** ask your instructor or the CFI. Most things in the Hub are approved or signed off by them.

1. Signing up as a student

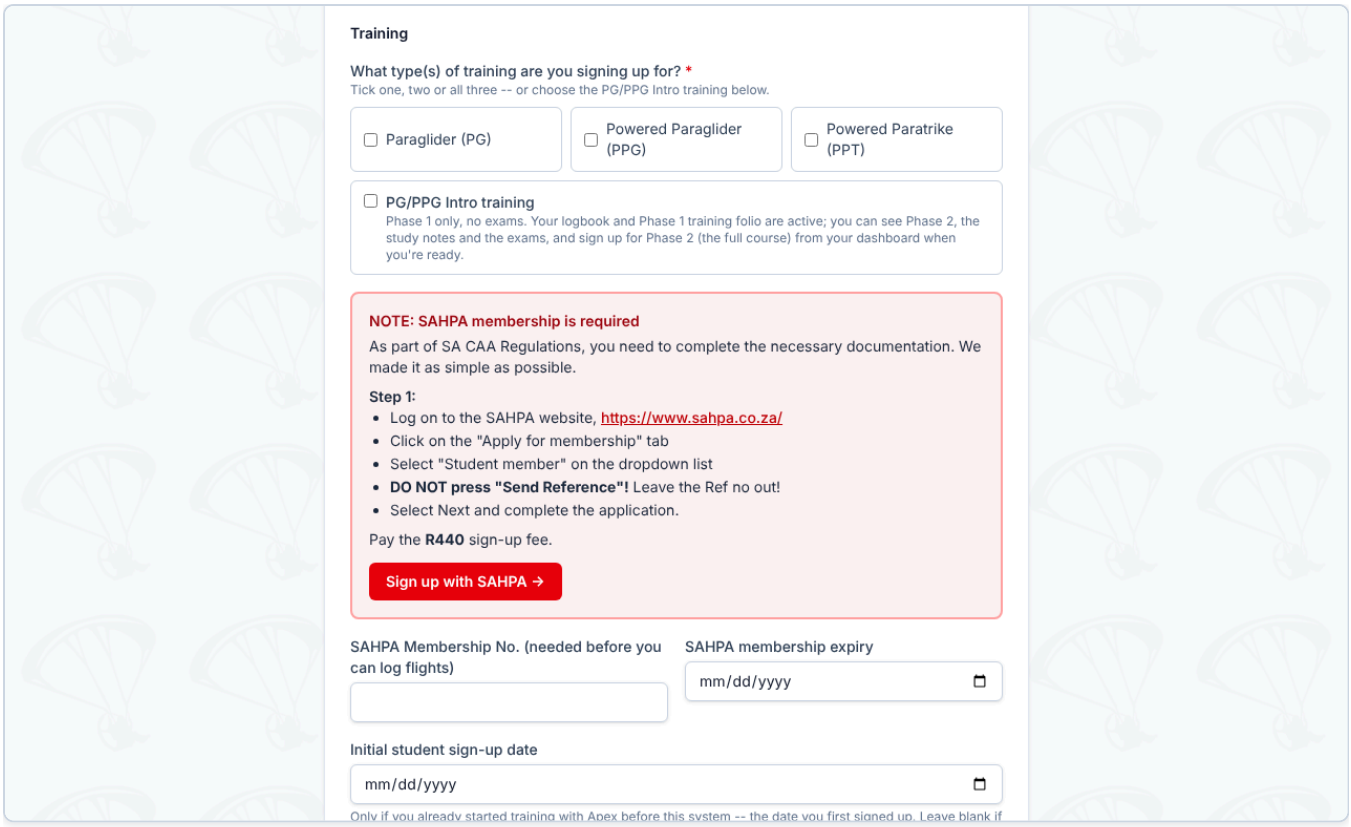

You sign up once, online. The CFI or the office then checks your details and approves you, and you get a WhatsApp when you can log in. If Team Apex sent you a WhatsApp invite, its link opens the same sign-up page.

1. Open the Hub and click **Sign up** under the login box.
2. Choose **New Student** at the top. (Licensed pilots and club members choose **Licensed Pilot / Club Member**.)

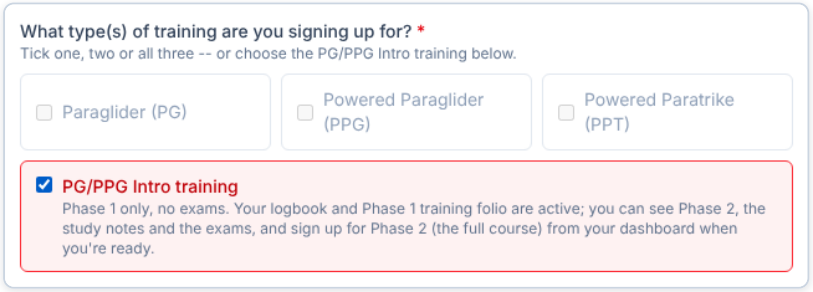

The top of the sign-up page: choose New Student

3. Under **Training**, tick the course(s) you are signing up for. You can tick one, two or all three of **Paraglider (PG)**, **Powered Paraglider (PPG)** and **Powered Paratrike (PPT)**.
4. **Or** tick **PG/PPG Intro training** if you are starting with Phase 1 only. That greys out the three boxes above. See the table below for the difference.

The Training section with the course options and the SAHPA note

Option	What you get
PG, PPG and/or PPT	The full course: logbook, the training folio for your course(s), study notes and exams.
PG/PPG Intro training	Phase 1 only, no exams. Logbook and Phase 1 folio are open; Phase 2, study notes and exams are shown but locked. Sign up for Phase 2 from your dashboard when you're ready (section 4).

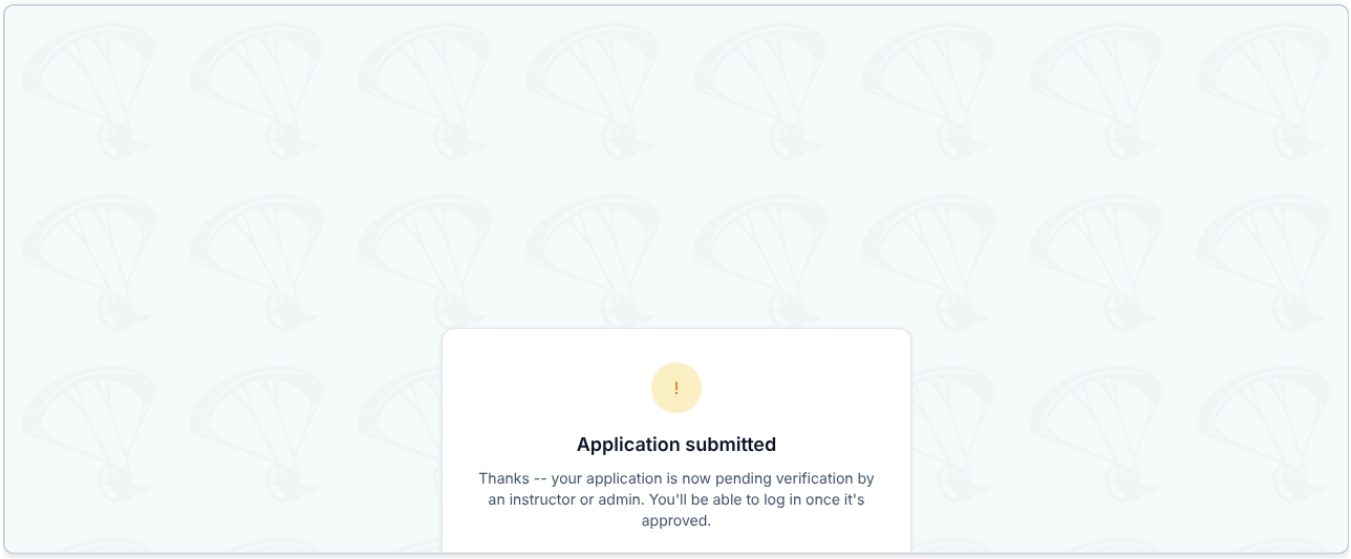

PG/PPG Intro training ticked

5. **SAHPA membership is required.** Follow the red NOTE: join SAHPA as a student member (R440 sign-up fee) with the **Sign up with SAHPA** button. Then type your **SAHPA Membership No.** and expiry date. You can also add the number later, but you can't log flights until it's in.
6. **Initial student sign-up date:** only if you already started training with Apex before the Hub. New students leave it blank.
7. Fill in your personal details, next of kin and medical details, and upload your ID/passport, a profile photo (passport-style, it goes on your licence forms) and your signature if you have one.

8. Sign the **Client Consent Form** and the **Indemnity** by typing your full name in each box. **View / download the document** opens the form so you can read it first.
9. Click **Submit application**.

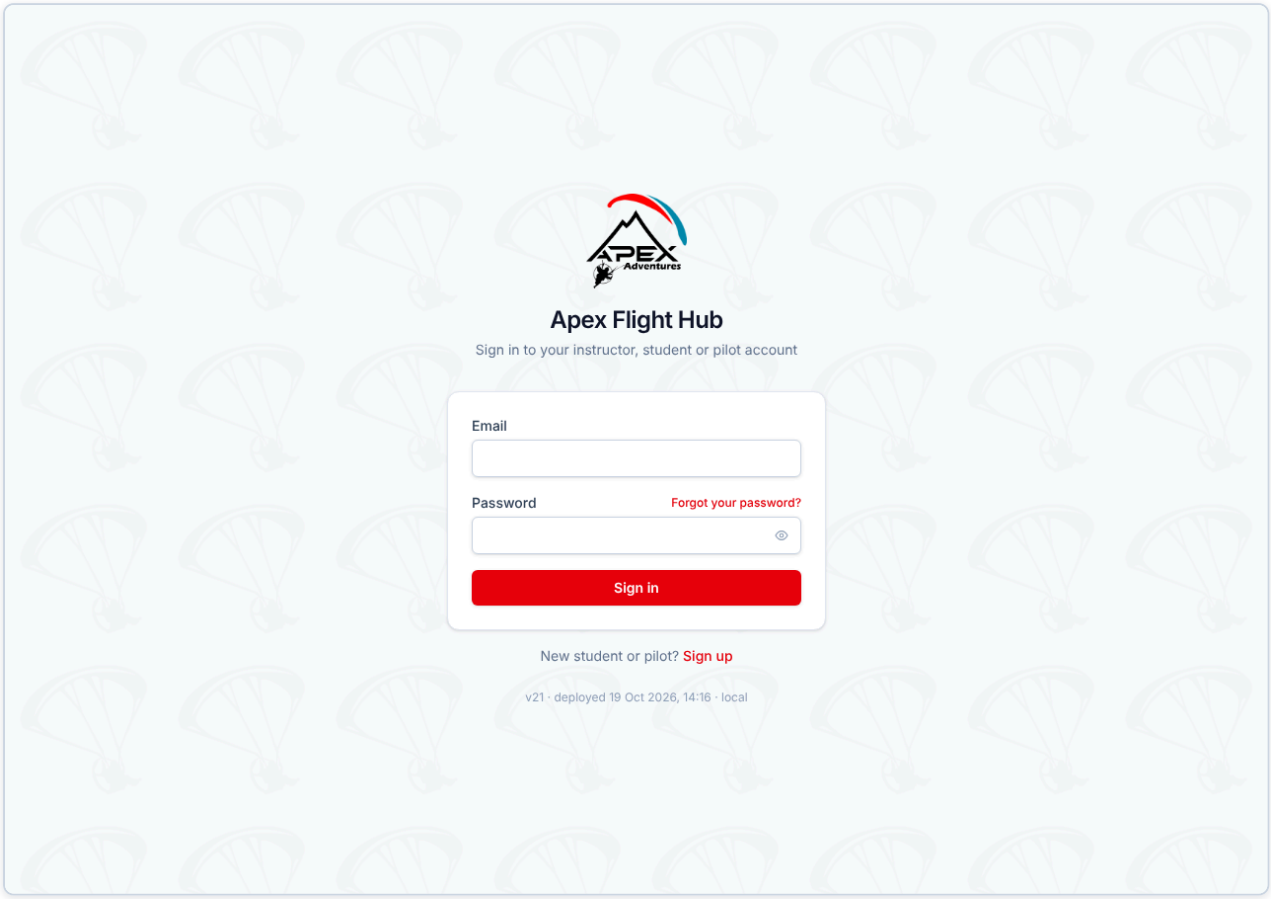

You then see the page below. You can't log in yet. Wait for the WhatsApp that says you're approved.

Waiting for approval

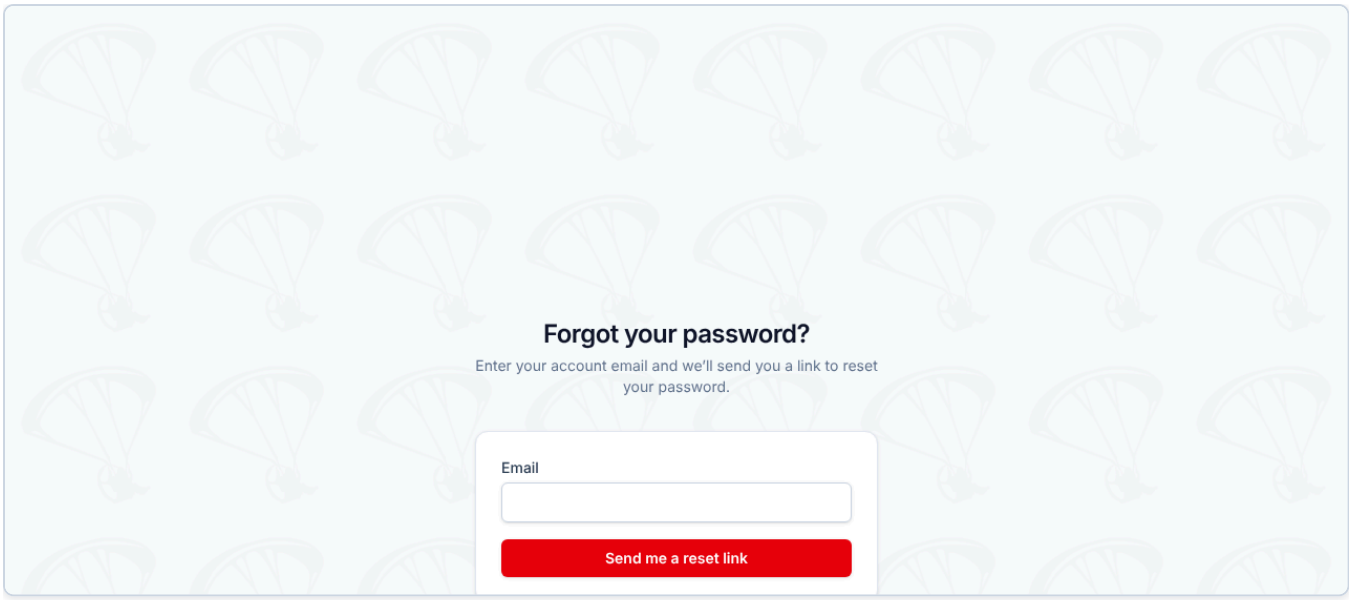

2. Logging in

Log in with the email address and password you chose at sign-up. The eye icon shows the password as you type.

The login page

Forgotten your password? Click **Forgot your password?**, type your email and click the button. You get an email with a reset link that works for 1 hour. If no email arrives (check spam), the office can reset it for you.

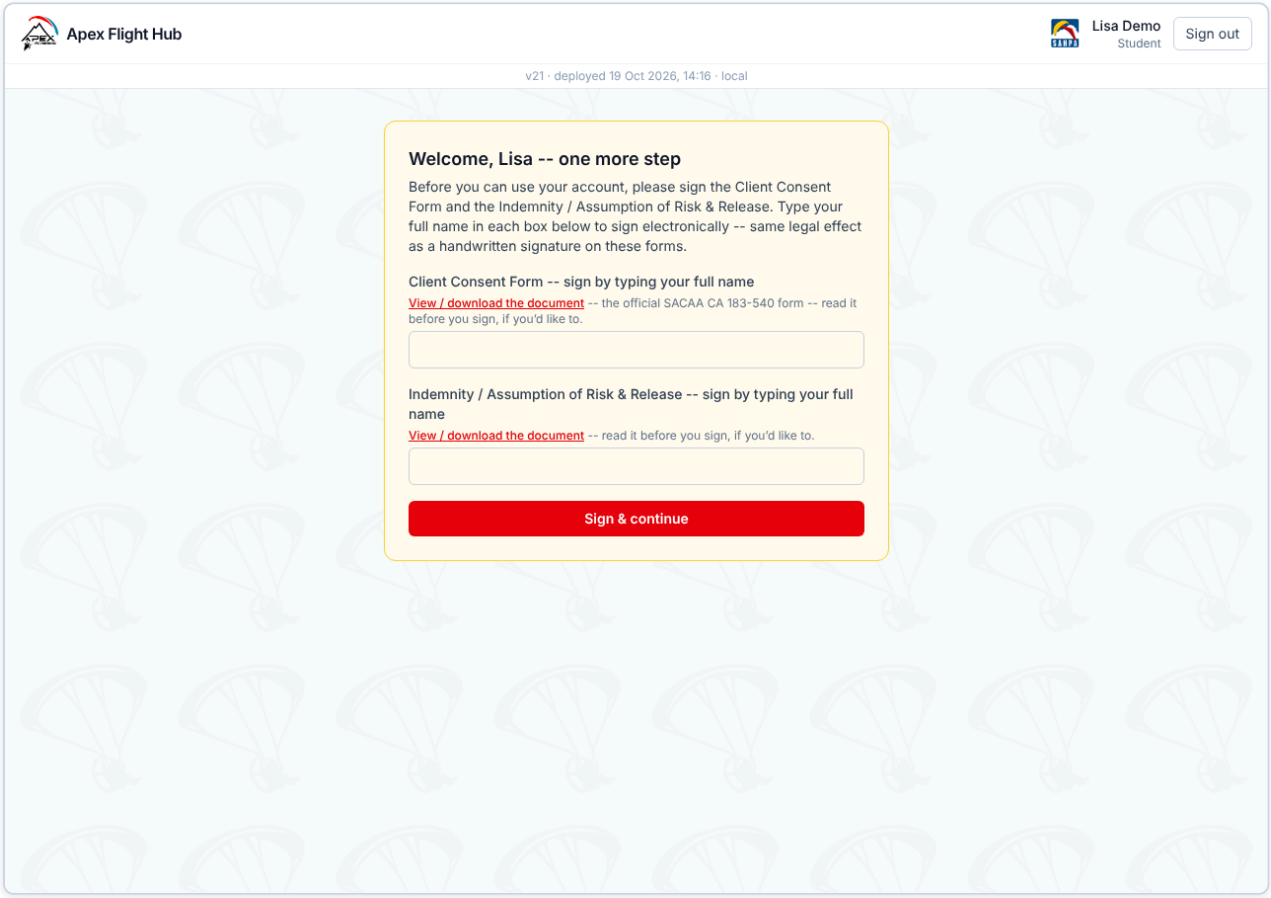

Forgot password

First-time screens

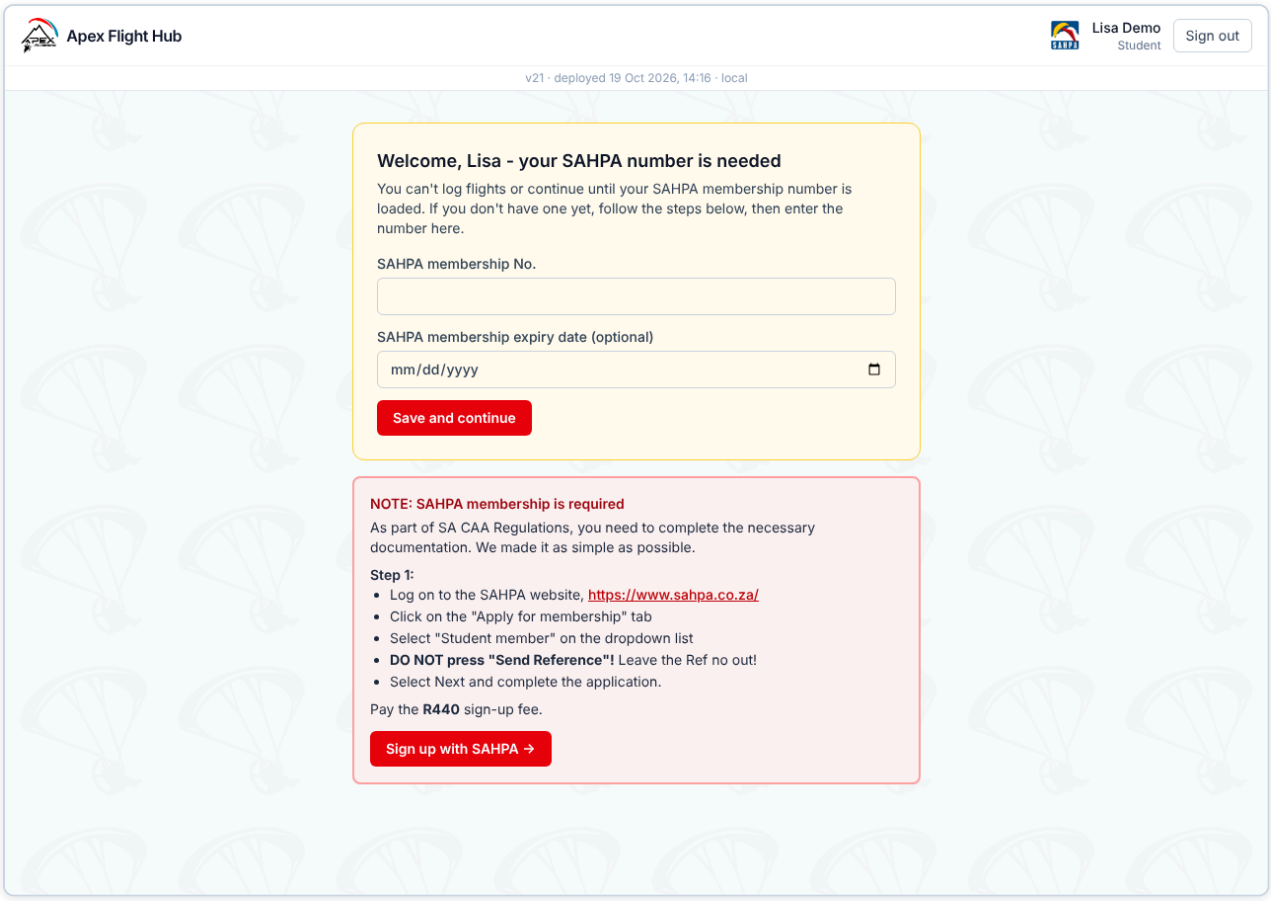

Two screens can appear before your dashboard. Each one appears only until you've done what it asks.

- **Consent and indemnity:** if they weren't signed at sign-up, type your full name in both boxes and click **Sign & continue**.

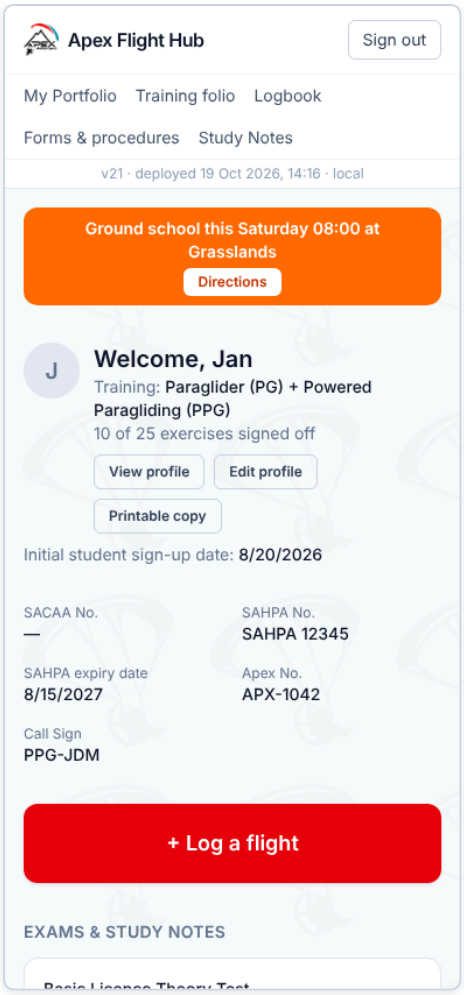

Sign the consent and indemnity

- **SAHPA number:** without a SAHPA membership number the Hub shows only this page, with the steps to join SAHPA. Type your number and save it, and everything opens.

Enter your SAHPA number

The Hub works the same on a phone; the menu folds into the top bar.

The dashboard on a phone

3. Messages and notifications

The Hub sends a WhatsApp at the big moments, from Team Apex's WhatsApp number, to the cell number on your profile. Keep that number up to date (Edit profile). The orange notice bar is shown in the dashboard picture in section 4. Password resets and pilot rating declines come by email.

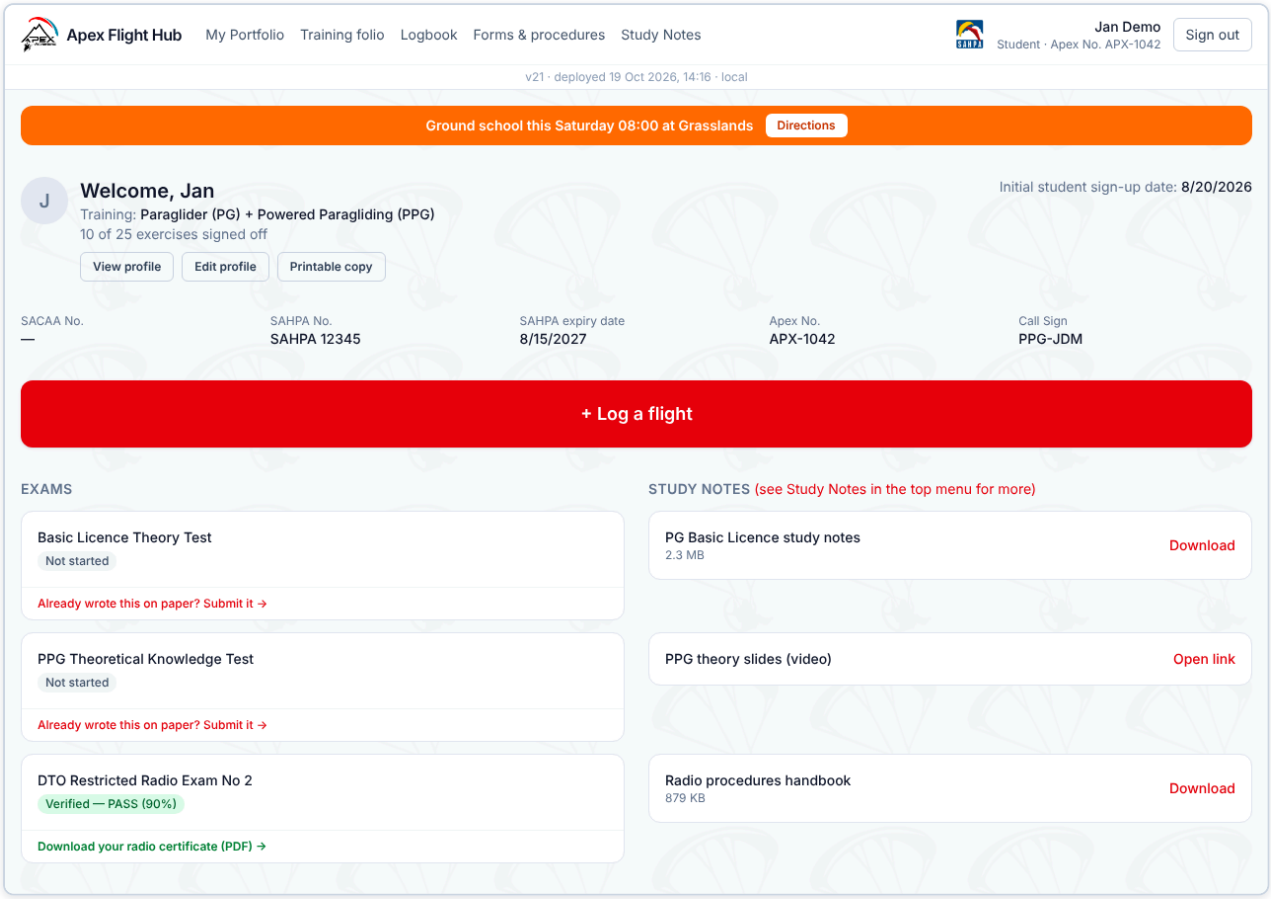

When	How	What it says (short)
Team Apex invites you	WhatsApp	"Please sign up as a student with Team Apex using this link..." with the sign-up link.
Your sign-up is approved	WhatsApp	"Good news! Your Apex Flight Hub student application has been verified and approved. You can now log in here..."
You ask for a new password	Email	A reset link that works for 1 hour.
Intro student: Phase 2 approved	WhatsApp	"Your sign-up for the full course is approved -- Phase 2 is now active... you can now view and download the study notes and write your exams."
You are signed off	WhatsApp	"Congratulations! ... has signed you off and awarded your Solo wings... Your status is now Pending upload of licence from CAA - upload your licence in the Hub once it arrives."
Pilot: a rating application declined	Email	The rating, the CFI's reason, and a link to re-apply.

Inside the Hub

- **Orange notice bar** under the menu: news from the CFI (ground school, weather days, a document to read). It may have a button that opens a link or a file.
- **Red "Action needed" boxes** at the top of your dashboard: for example, answer the Yes/No question about using your saved signature on your SAHPA/CAA forms, or (pilots) an application that was declined.
- **Status on your dashboard:** exam results (Submitted, Verified PASS/FAIL), a Phase 2 request waiting or declined (with the CFI's reason), a SAHPA expiry date in red when it has expired.
- **Logbook:** each flight shows **Pending** until your instructor countersigns it, then **Verified** with any comment.

4. Your dashboard (My Portfolio)

My Portfolio is the home page after you log in. The menu at the top has My Portfolio, Training folio, Logbook, Forms & procedures and Study Notes.

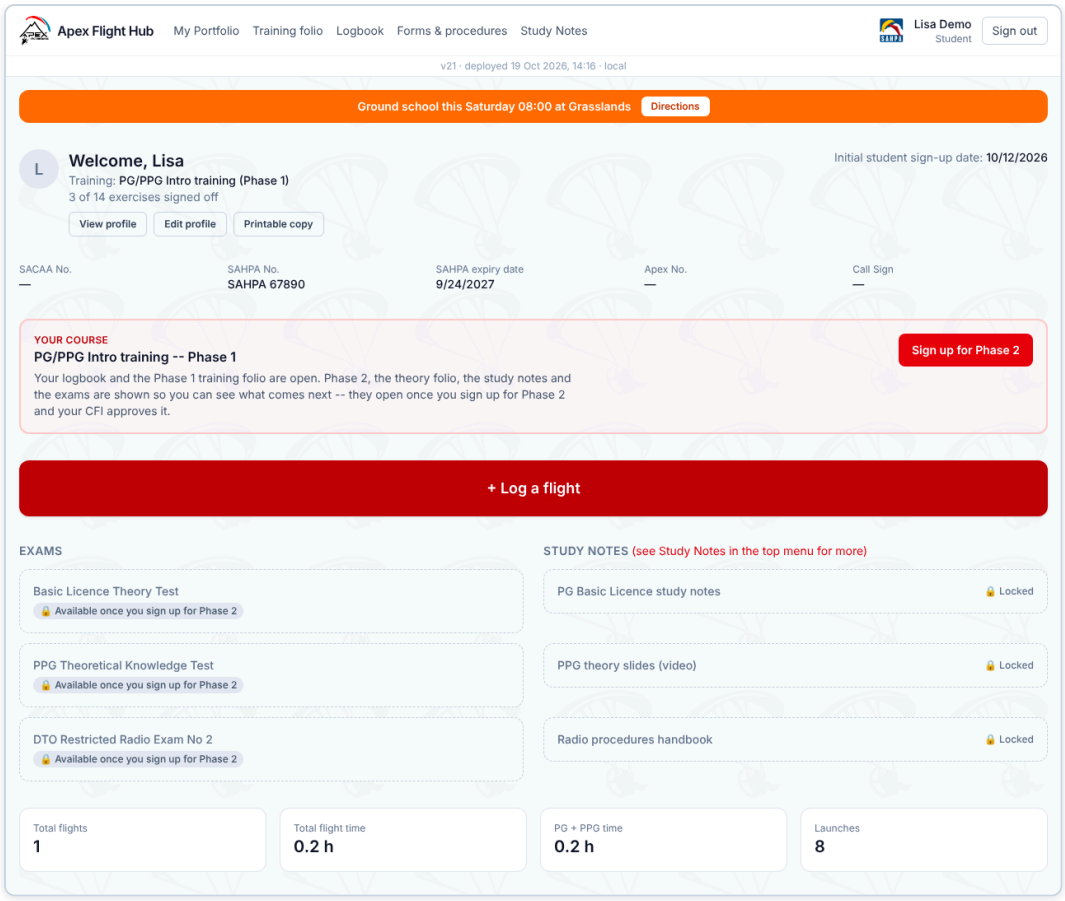

The student dashboard

From top to bottom:

- **Welcome line:** your course(s), how many exercises are signed off, and **View profile**, **Edit profile** and **Printable copy**. On the right is your initial sign-up date (set by the CFI).
- **Your numbers:** SACAA No., SAHPA No., SAHPA expiry (red when expired), Apex No. and call sign.
- **+ Log a flight:** the big red bar opens the logbook (section 5).
- **Exams and Study Notes:** each exam for your course, with its study notes beside it (section 7).
- **Flight totals:** flights, flight time, time on your course's equipment, launches.
- **Progress by section:** a bar per training section, in phase order (section 6).

PG/PPG Intro training and Phase 2

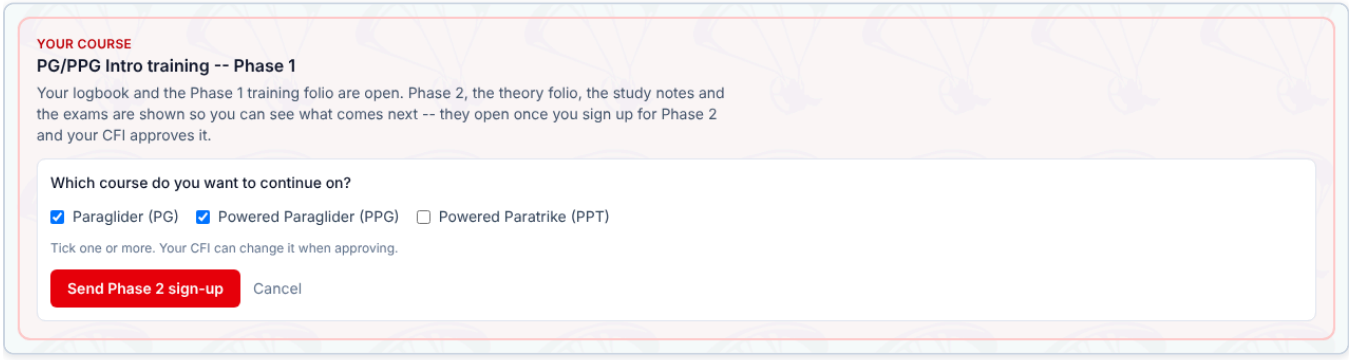

An intro student sees a **Your course** card. The exams and study notes have a lock, and the Phase 2 and theory sections are greyed out with "(after Phase 2 sign-up)".

An intro student's dashboard

When you're ready for the full course:

1. Click **Sign up for Phase 2**.
2. Tick the course(s) you want to continue on: **PG**, **PPG** and/or **PPT**. You can change course here.
3. Click **Send Phase 2 sign-up**. The card shows "waiting for your CFI".

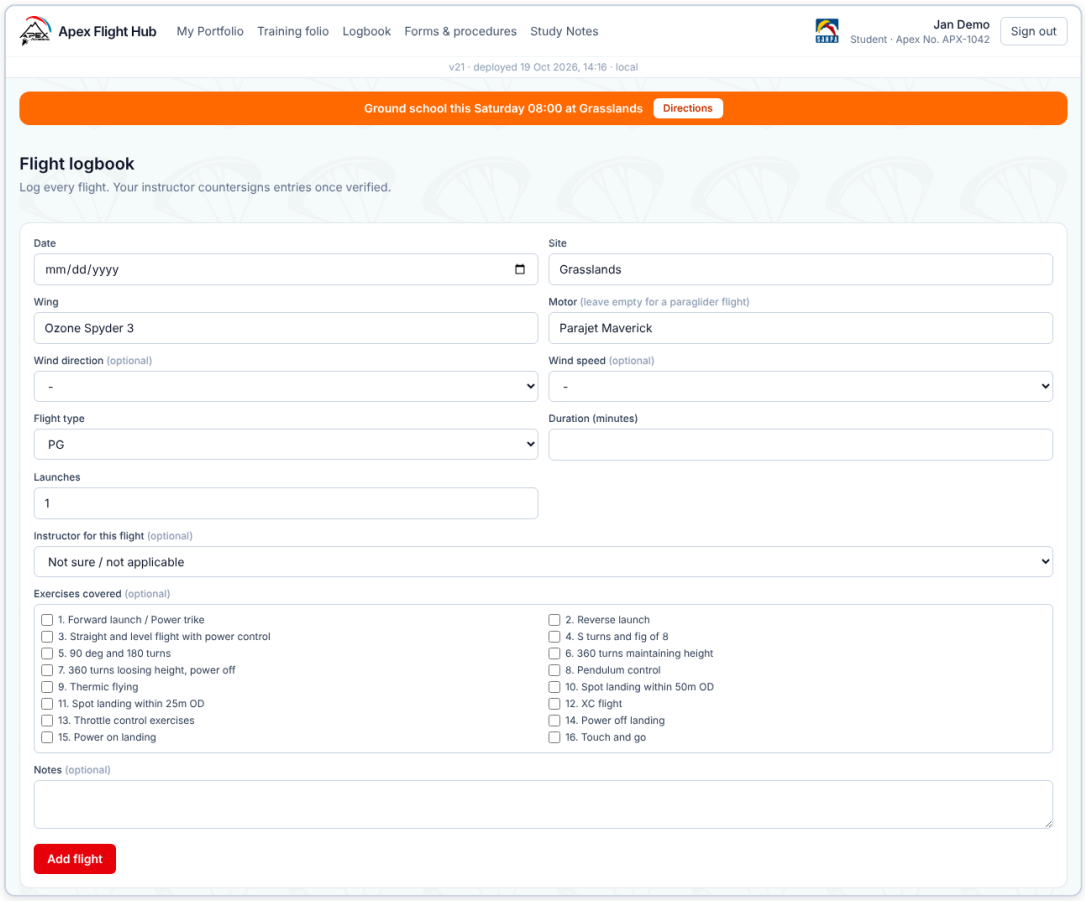

Signing up for Phase 2

The CFI approves it (he may adjust the courses) and you get a WhatsApp. You are then a normal student: your logbook and Phase 1 sign-offs stay, and the study notes and exams open. If the CFI declines, the card shows his reason and you can ask again later.

5. Logbook

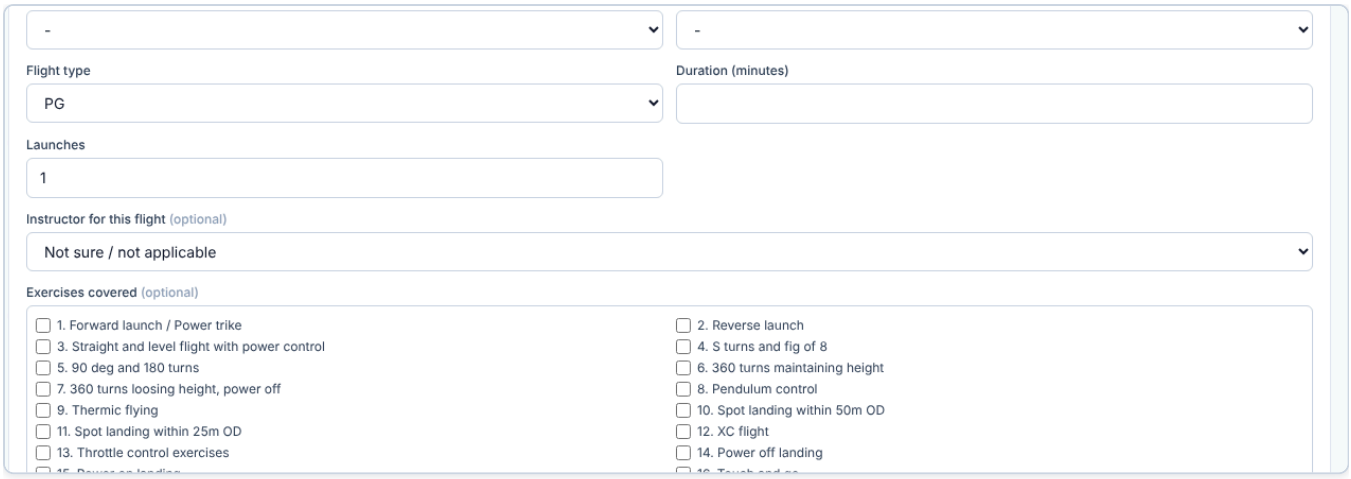

Log every flight here, the same day if you can. Your instructor checks each entry and countersigns it; until then it shows **Pending**.

1. Click **+ Log a flight** on the dashboard, or **Logbook** in the menu.
2. Fill in the form:
   - **Date** and **Site** (for example Grasslands or Stilbaai).
   - **Wing** and **Motor**: each offers the ones you used before. Leave Motor empty for a paraglider flight.
   - **Wind direction** and **Wind speed** (optional).
   - **Flight type** (PG, PPG, PPT or winching), **Duration** in minutes and **Launches**.
   - **Instructor for this flight** (optional) and the **Exercises covered**.
   - **Notes** (optional).
3. Click **Add flight**.

Logging a flight

Your flights are listed underneath, newest first. Each has a **Flight No.** (1, 2, 3… in date order) and the accumulated time. The status shows **Pending** or **Verified**. Long comments and exercise lists show on one line: hover over one to read it all, or tap it on a phone.

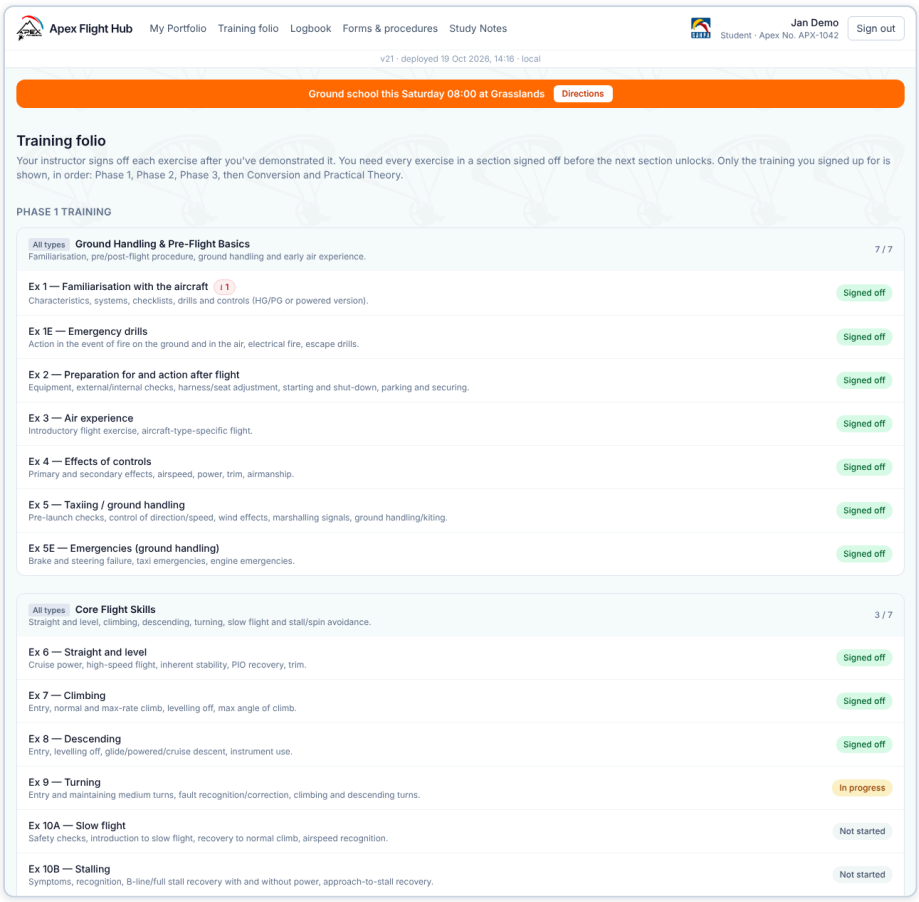

The flight list with Flight No., wind, status and the instructor's comment

- You can't edit or delete a flight yourself. If something is wrong, ask your instructor; they can correct or delete it.
- Flights from another logbook can be imported with **Import flights from a CSV or Excel file**.
- The Logbook page also shows totals for the last 12 or 24 months.

6. Training folio

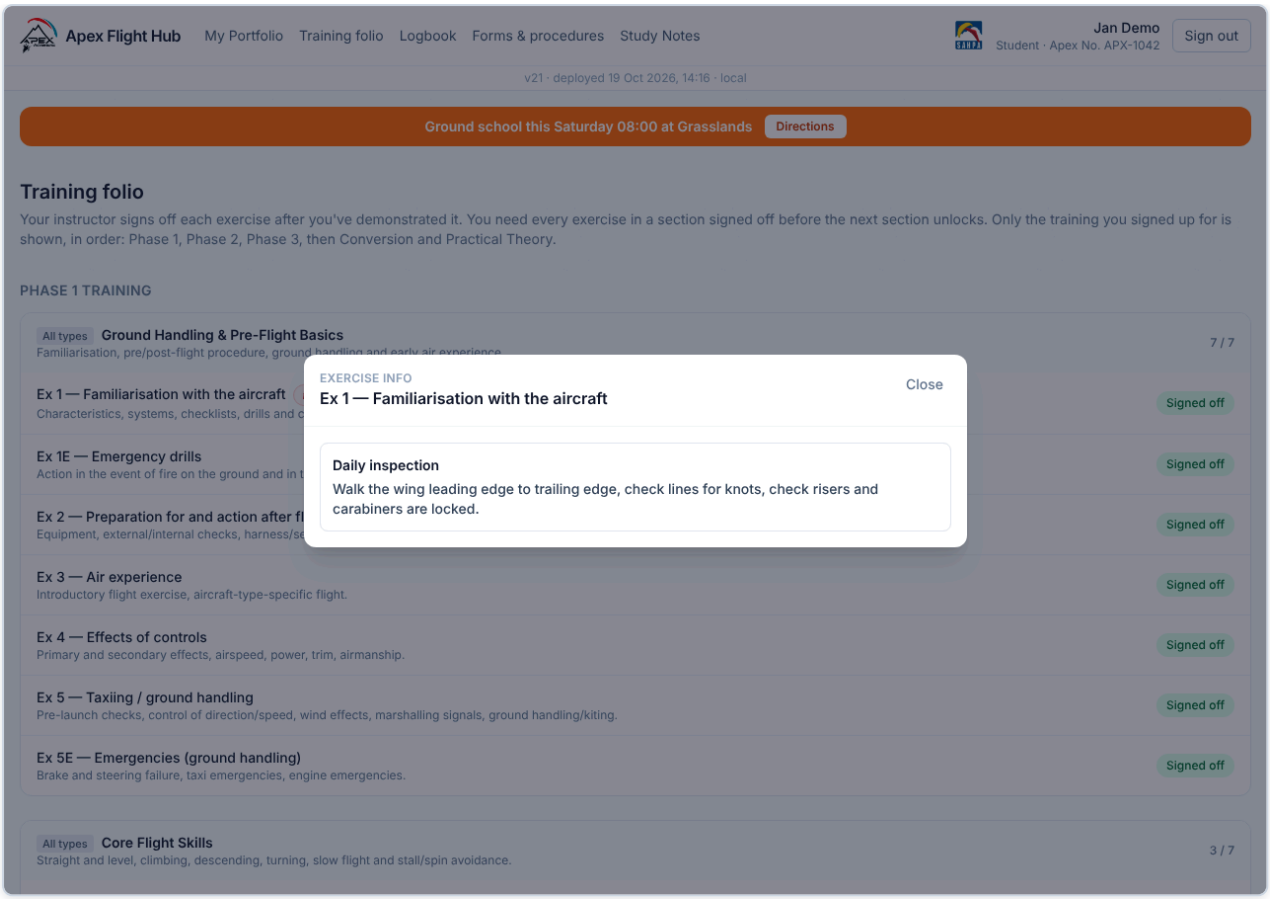

The **Training folio** lists every exercise of your course, grouped into sections and shown in phase order: Phase 1, Phase 2, Phase 3, then Conversion and Practical Theory. Your instructor marks each exercise **Not started**, **In progress** or **Signed off**.

- A section **unlocks** when every exercise in the section before it is signed off. Locked sections are greyed out: "Locked -- finish the previous section first".
- Each section shows how many of its exercises are signed off (for example 7 / 7).
- Intro (Phase 1) students see the later phases greyed out with "Not part of your intro course".

The training folio

An exercise with a small red **i** button has extra information from the CFI: notes, pictures, documents or video links. Click it to open; **Close** or the Escape key shuts it.

Exercise information from the CFI

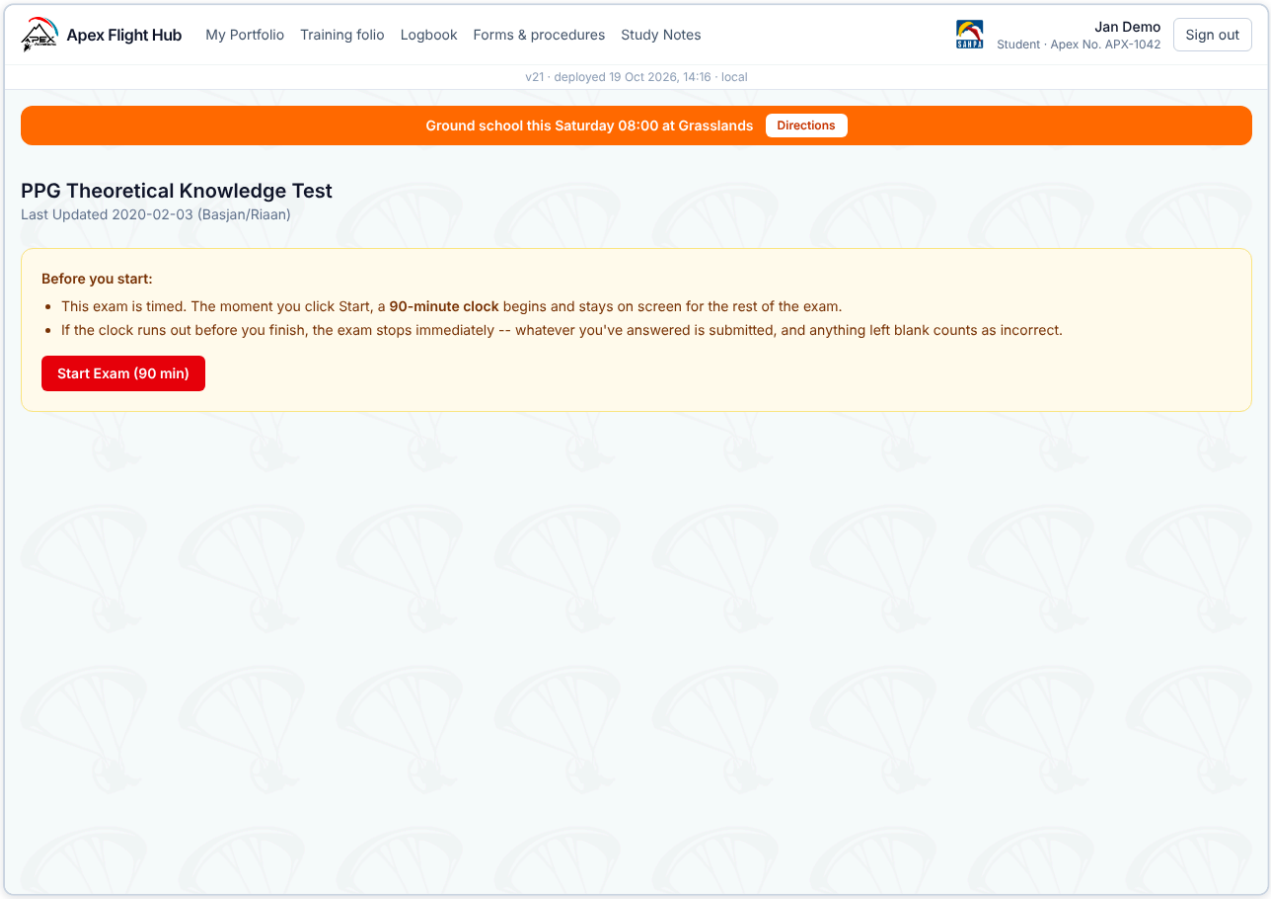

7. Exams and study notes

You only see the exams for your course:

Your course	Exams you see
PG	Basic Licence Theory Test
PPG	Basic Licence Theory Test, PPG Theoretical Knowledge Test, DTO Restricted Radio
PPT	Basic Licence Theory Test, PPT test (being built), DTO Restricted Radio
PG/PPG Intro	Shown with a lock until Phase 2 is approved

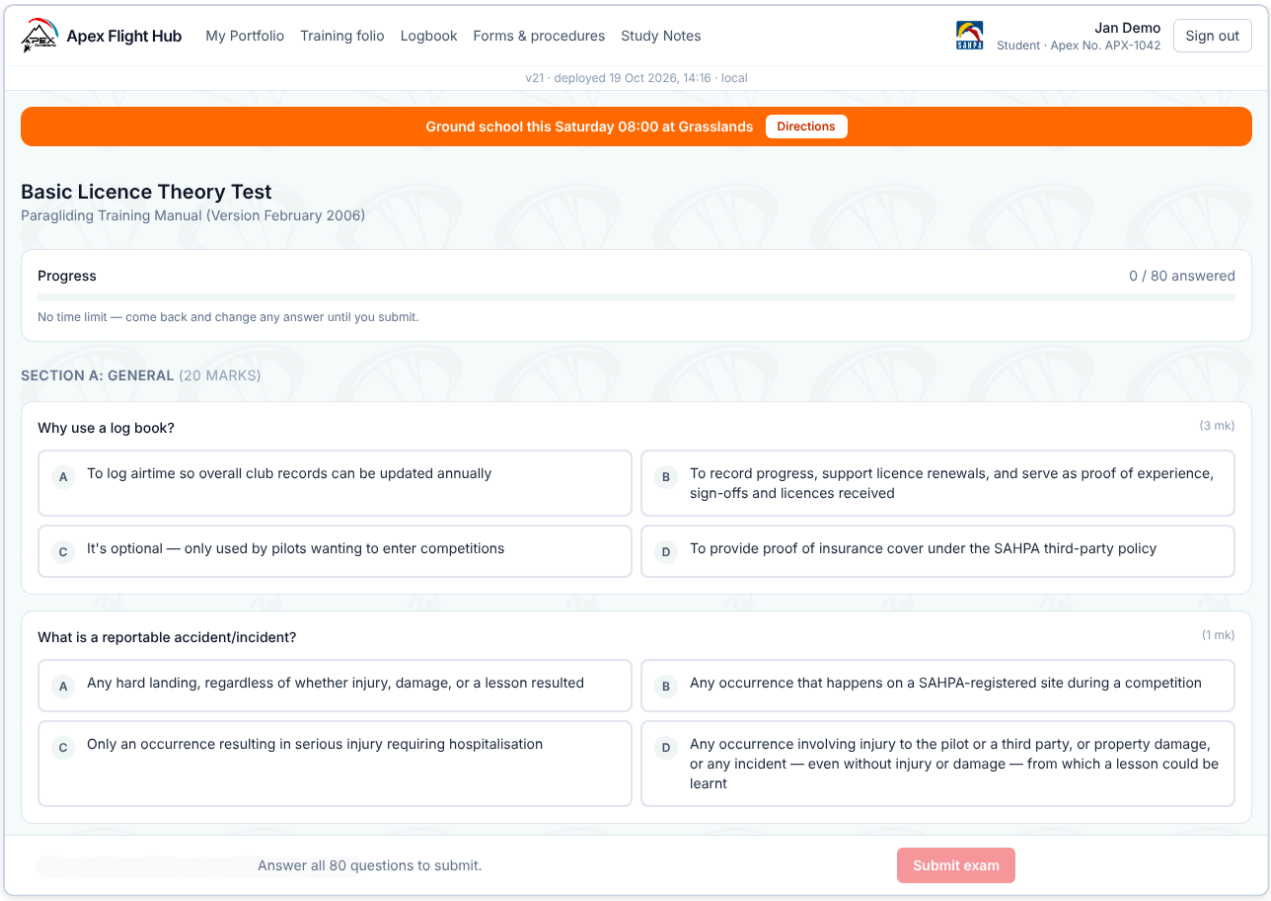

Writing an exam online

1. On the dashboard, click the exam.
2. **Timed exams** (Radio 60 minutes, PPG 90 minutes) show a warning first. The clock starts when you click start, and when time runs out your answers are submitted automatically.

A timed exam asks you to confirm before the clock starts

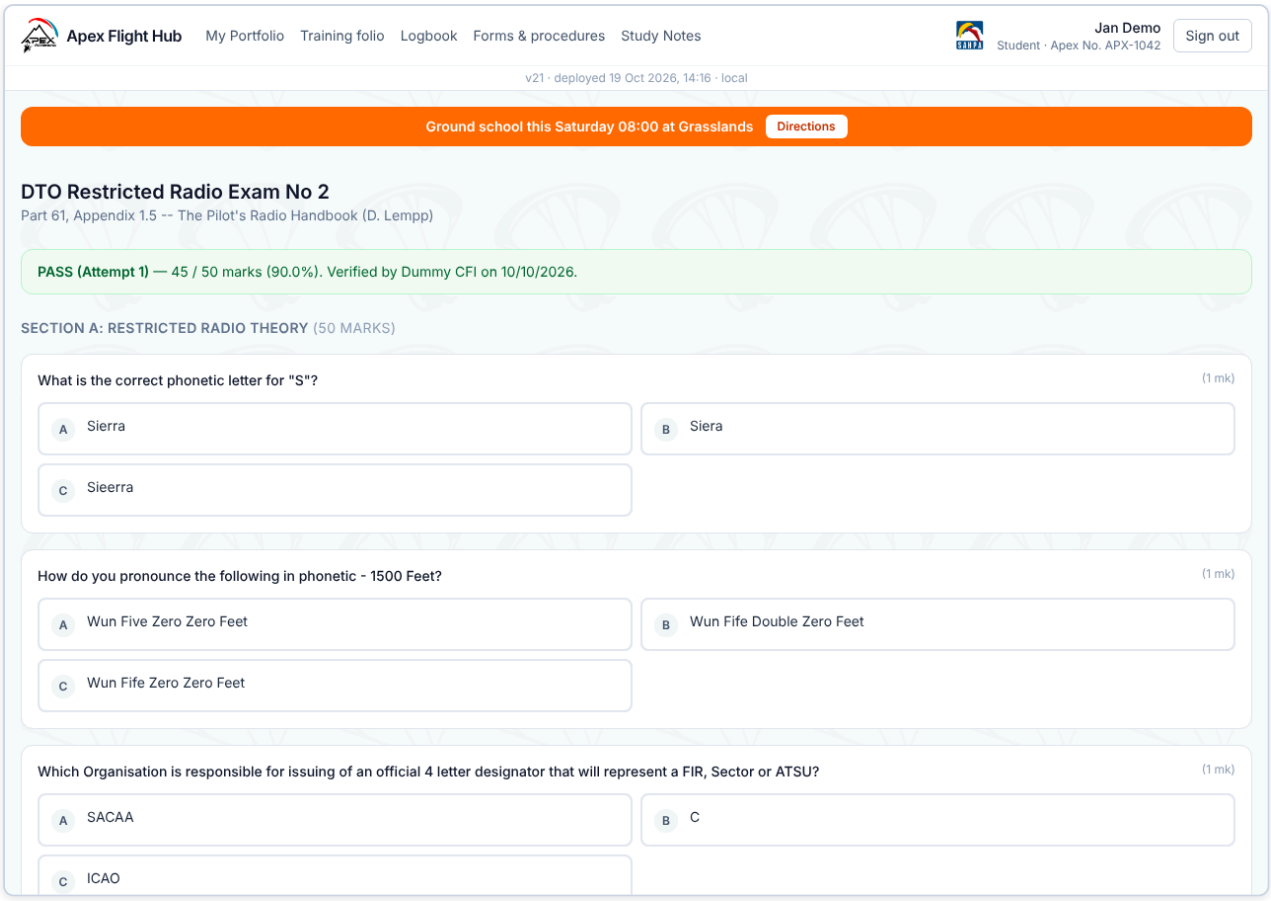

3. Click an answer for each question. Answers save as you go, and in an untimed exam you can come back later and change any answer.
4. When every question is answered, click **Submit exam**. You can't change answers after that.

Writing the Basic Licence Theory Test

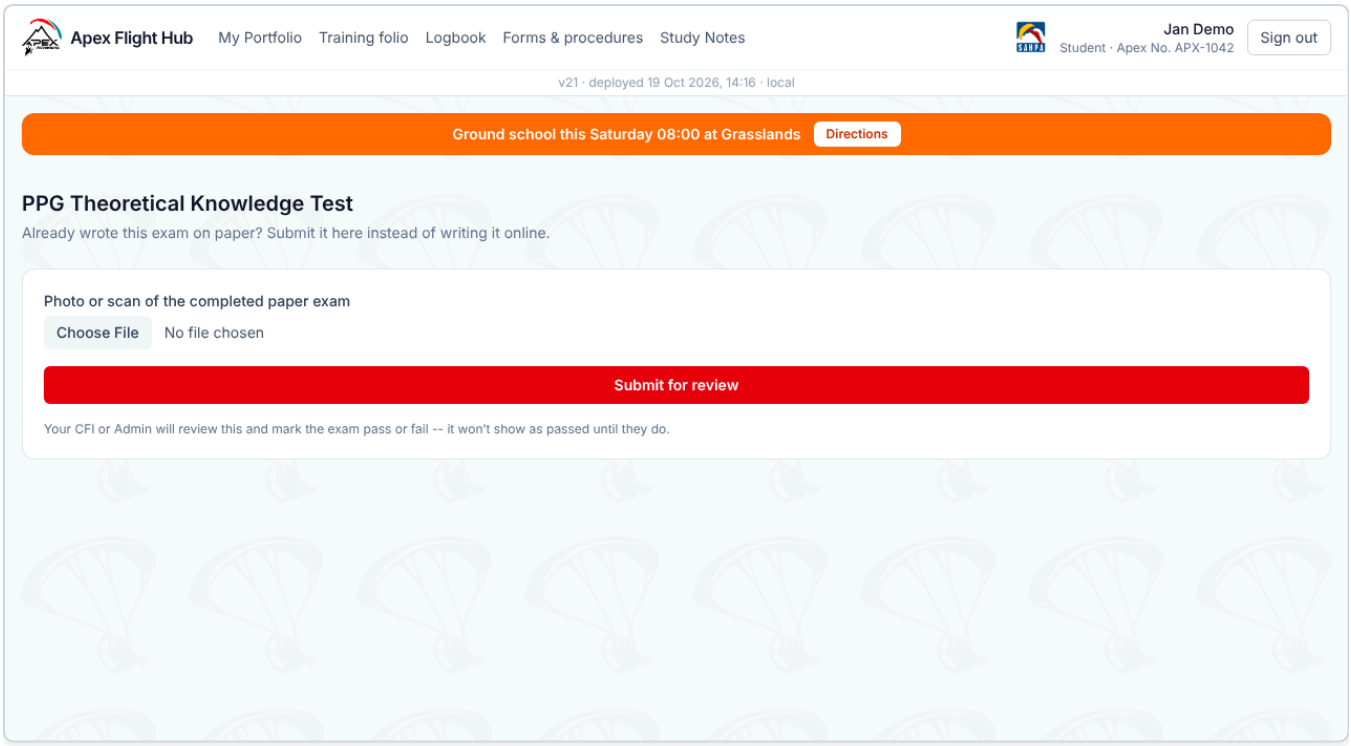

Your result

After you submit, the exam shows **Submitted -- awaiting verification**. Your instructor or the CFI checks it and verifies it as **PASS** or **FAIL**. Some sections must be fully correct whatever your overall score, such as Air Law in the PG test. If the CFI corrected a question after discussing it with you, you see the correction and their note under that question. After a pass in the radio exam you can download your radio certificate.

A verified result

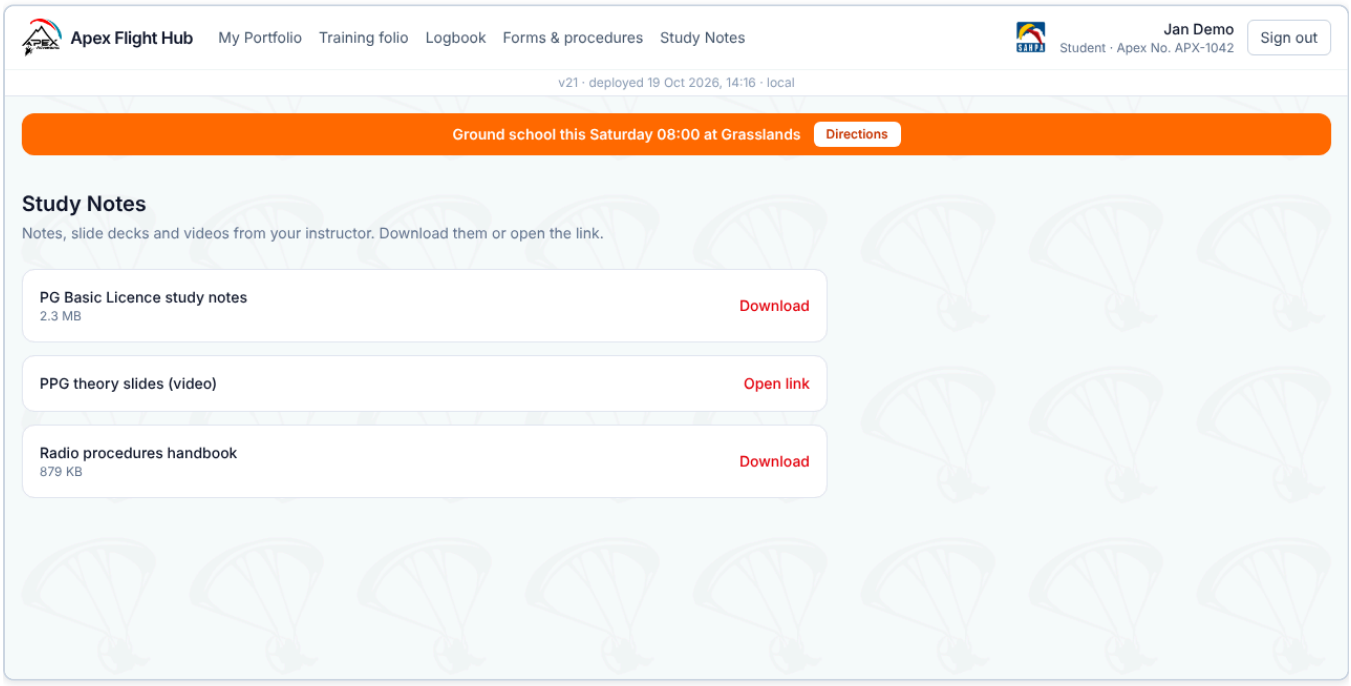

- **After a FAIL** you can start a new attempt. The radio exam has a 7-day wait.
- **Wrote it on paper, or already hold a radio licence?** Click **Already wrote this on paper? Submit it** (or **Already hold a radio licence? Submit it**) under the exam. Upload the scan or photo (and the licence number for radio). The CFI reviews it and marks it passed or failed.

Submitting a paper exam

Study notes

Study notes sit next to their exam on the dashboard, and all of them are on the **Study Notes** page in the menu. Click **Download** for a file or **Open link** for a video or a large file kept online.

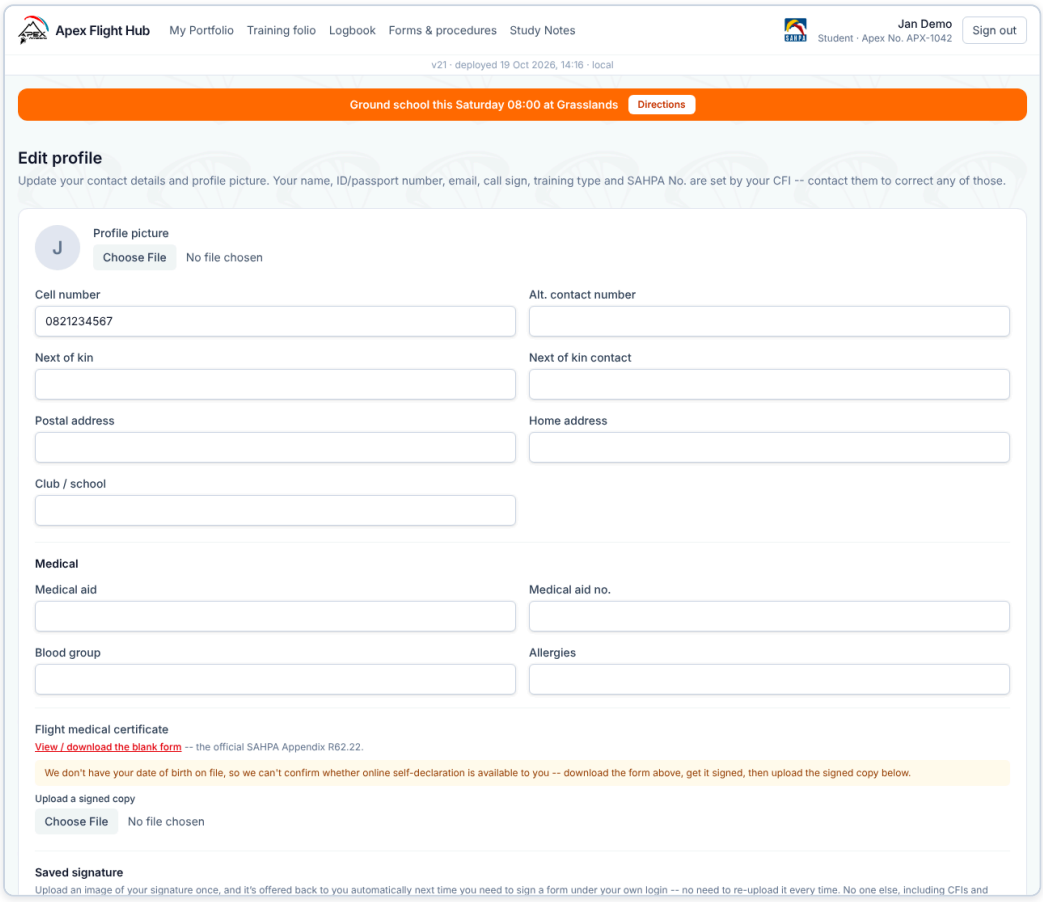

The Study Notes page

8. Profile, forms and printing

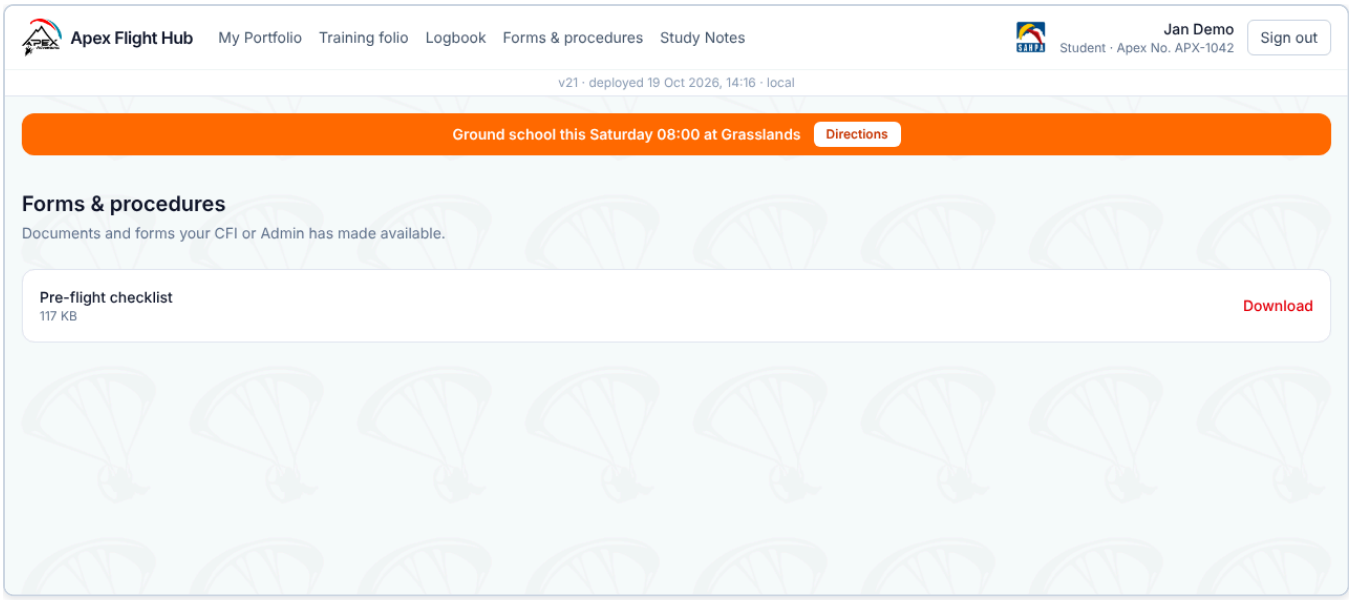

Edit profile (on the dashboard) is where you keep your details current. Your name, ID number, email, call sign, training type and SAHPA No. are set by the CFI; ask them to correct those.

- **Profile picture:** use a passport-style photo. It is used for your licence forms.
- **Contact, next of kin, addresses, club, medical aid, blood group, allergies.**
- **Flight medical certificate:** download the blank SAHPA R62.22 form, get it signed, and upload the signed copy. Where allowed, you can self-declare online instead; it lasts 12 months.
- **Saved signature:** upload a picture of your signature once. Then answer the compulsory **Yes / No** question: may your signature be placed on your SAHPA/CAA forms when you're signed off? On **No**, you sign those forms by hand.
- Click **Save**. Files you uploaded have a **View** button.

Edit profile

- **Forms & procedures** (menu): school forms and procedures to download, such as the pre-flight checklist.
- **View profile** shows everything on one page, with your flight totals.
- **Printable copy** gives a print-friendly portfolio (profile, flying summary and folio). Use your browser's Print and choose "Save as PDF" to keep a copy.

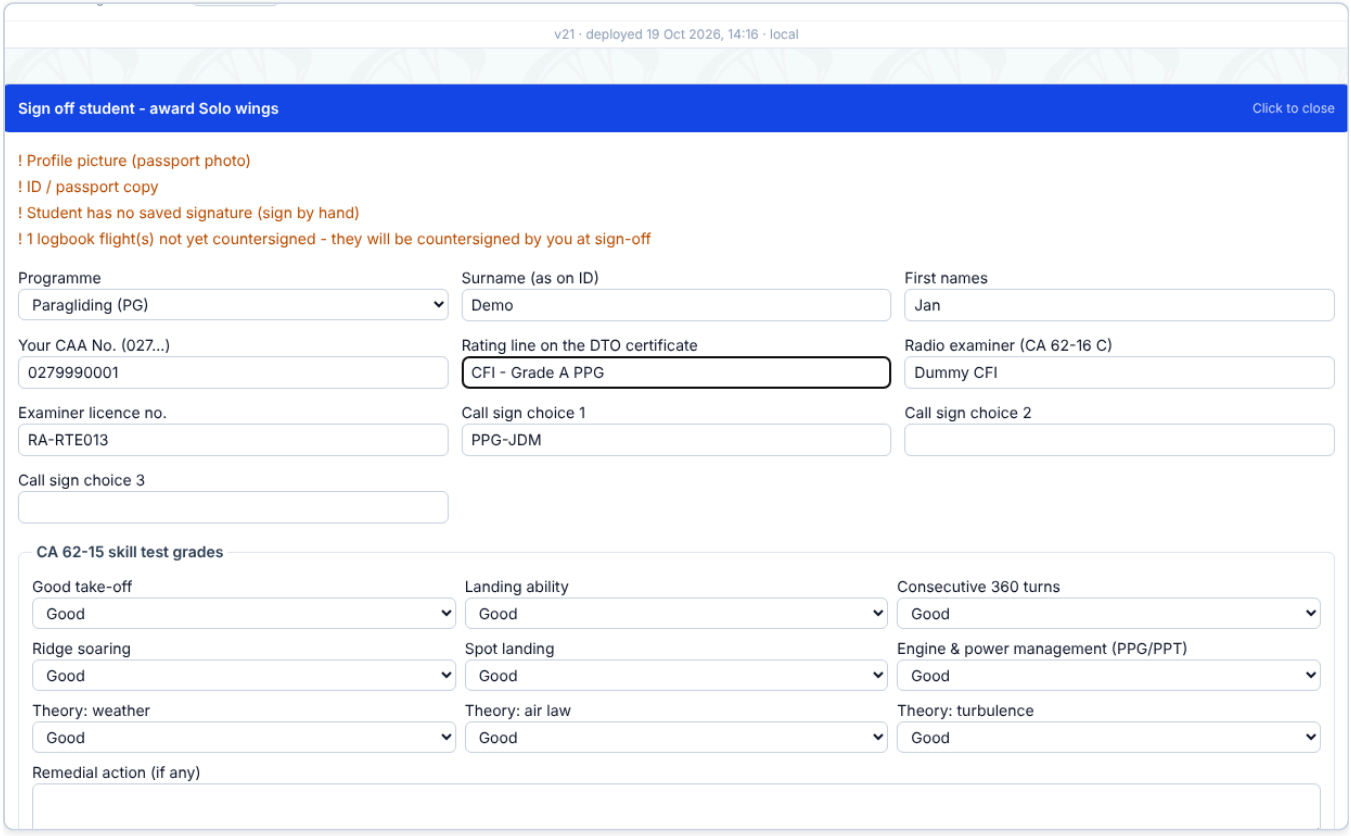

Forms & procedures

9. Signing off: Solo wings and your licence application

When your instructor is happy with your training, logbook and exams, they sign you off in the Hub. This awards your **Solo wings** and prepares your SAHPA/CAA licence application.

What the instructor does

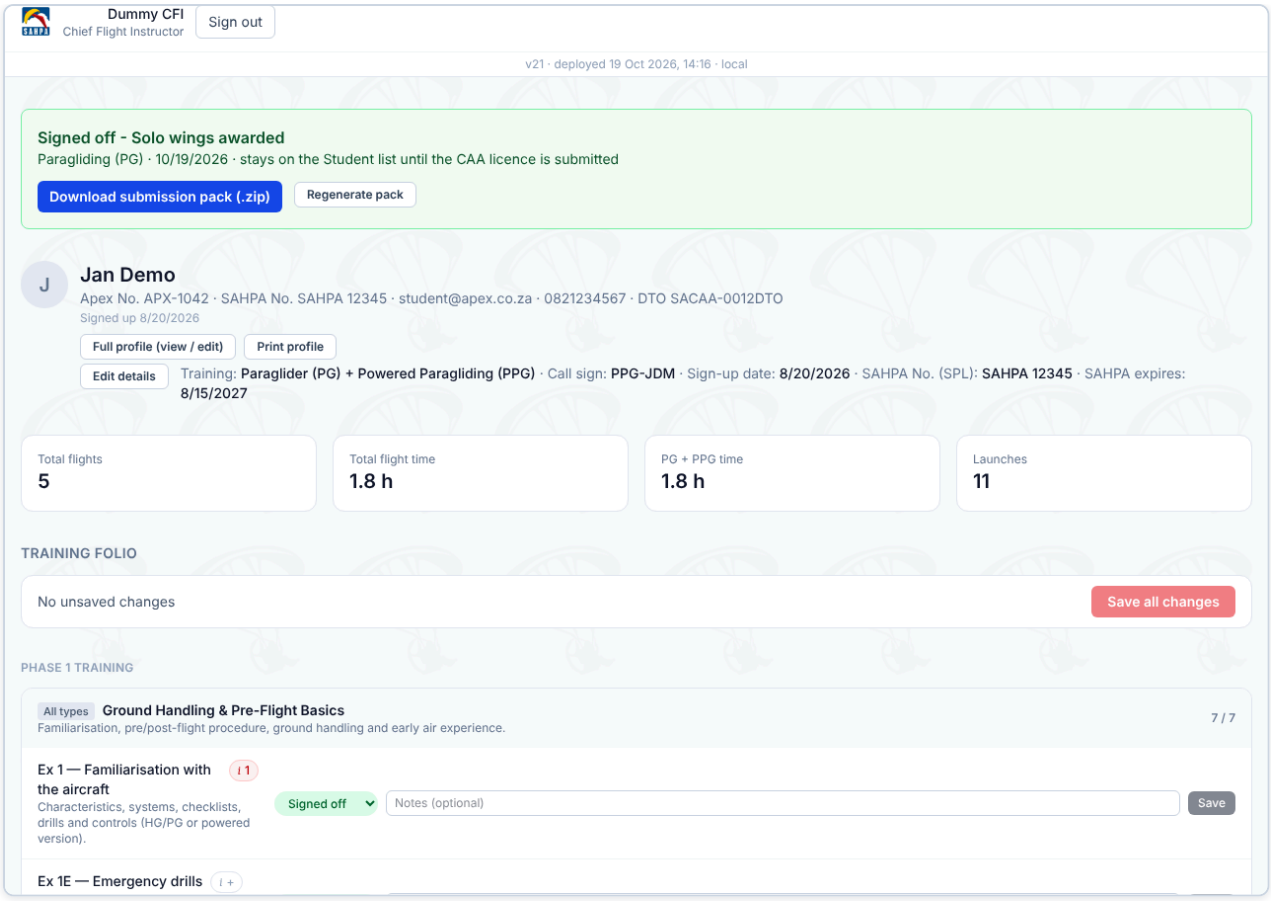

On your folio the instructor opens **Sign off student - award Solo wings**. A checklist shows anything still missing: passport photo, ID copy, signature consent, flights not yet countersigned. They then fill in the programme, your names as on your ID, their CAA number, the radio examiner, up to three call-sign choices and the skill test grades.

The sign-off form (instructor's view)

On sign-off:

- every flight still pending is countersigned;
- you, the instructor and the CFI get a WhatsApp;
- the instructor gets a **submission pack** (ZIP) to send to SAHPA/CAA. It holds the completed forms (CA 183-540 consent, SAHPA medical fitness R62.22, CA 62-16, CA 62-15), your passport photo, a logbook copy, the radio and DTO certificates, copies of your passed exams and the Solo Wings certificate.

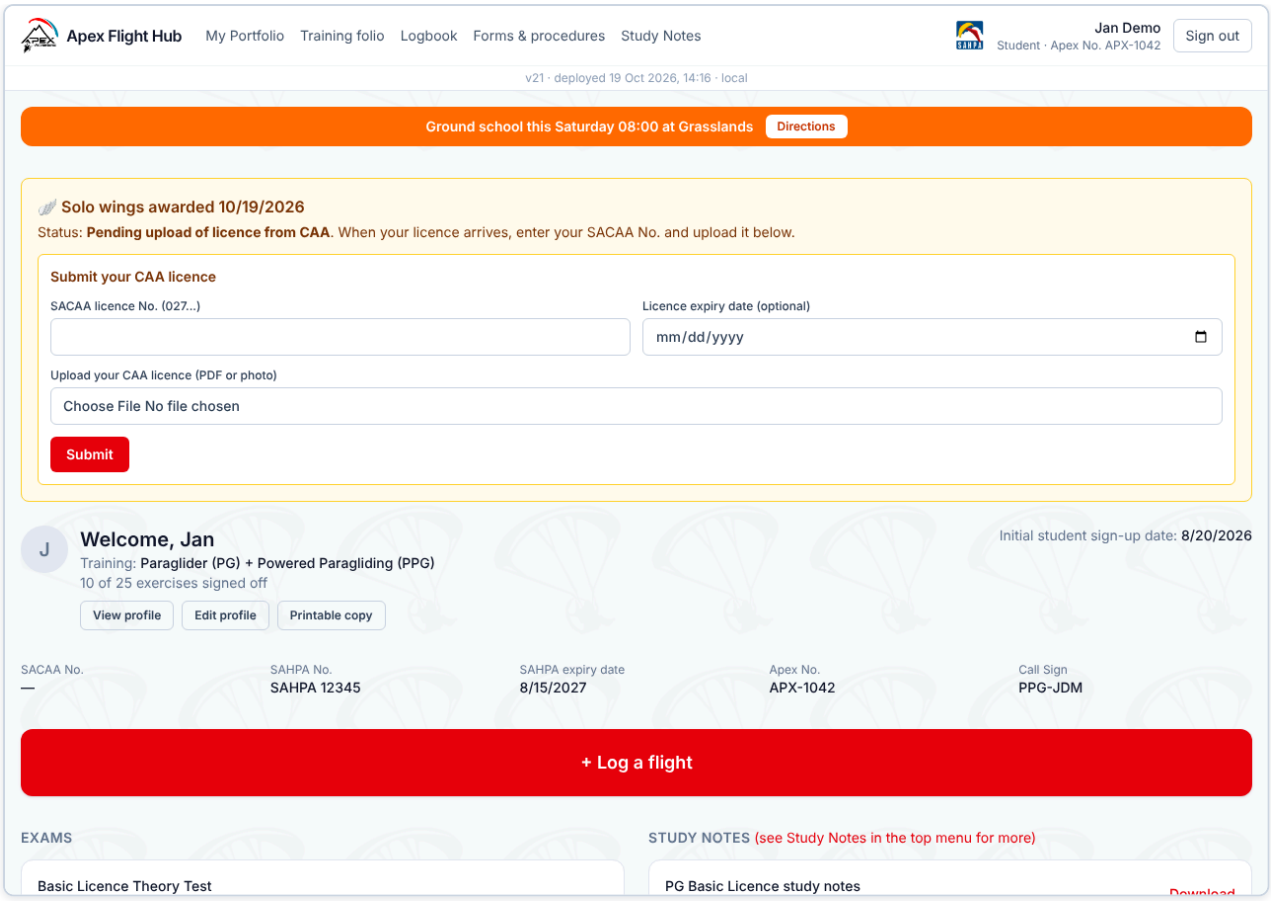

Signed off: Solo wings awarded and the pack ready to download

Your signature goes on the forms only if you answered **Yes** to the signature question on your profile. Otherwise you sign them by hand.

What you see

You stay a student until your licence arrives. Your dashboard shows **Solo wings awarded** and the status **Pending upload of licence from CAA**.

Your dashboard after sign-off

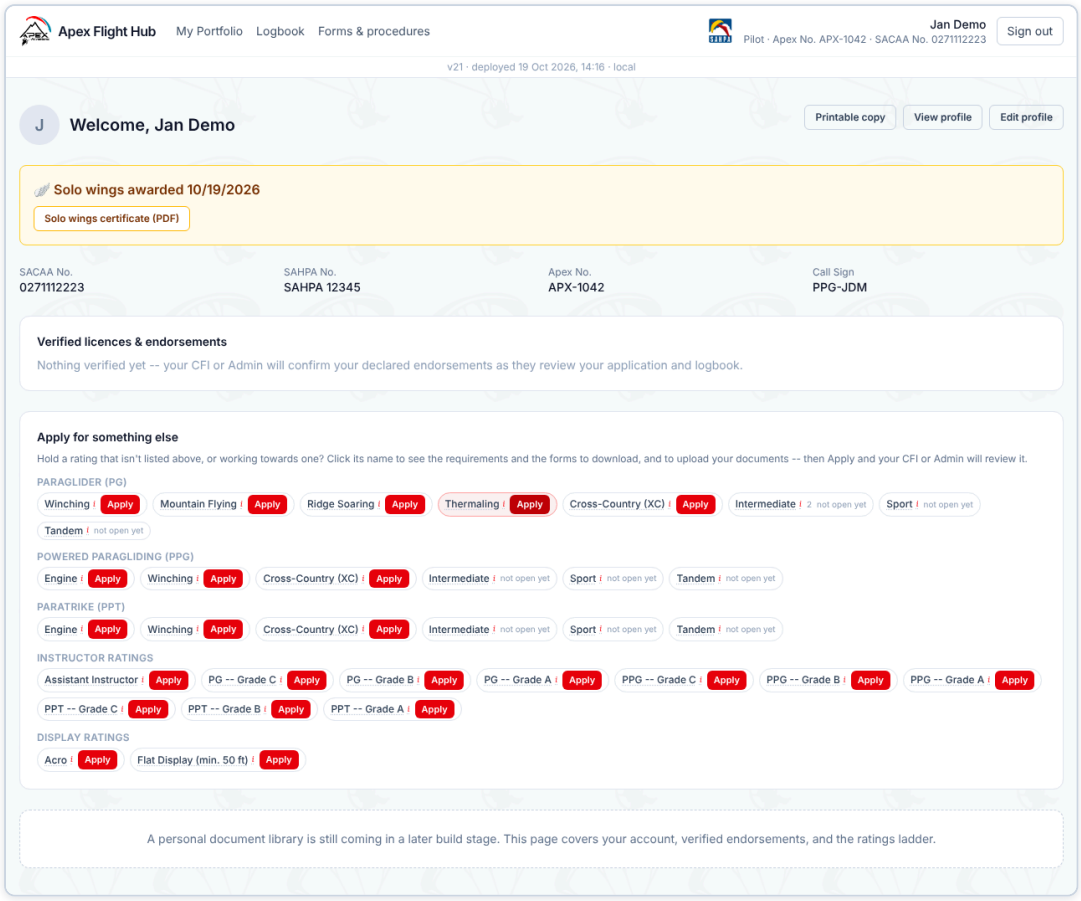

When the CAA licence arrives:

1. Type your **SACAA licence No.** (027…) and, if you have it, the expiry date.
2. Upload a PDF or photo of the licence.
3. Click **Submit**.

Your account then becomes a **pilot** account (section 10). Your logbook comes with you.

10. As a pilot

As a pilot, the Hub keeps your logbook, licence, expiry dates and ratings in one place. You get here after sign-off, or by signing up as a **Licensed Pilot / Club Member**. The menu is **My Portfolio**, **Logbook** and **Forms & procedures**.

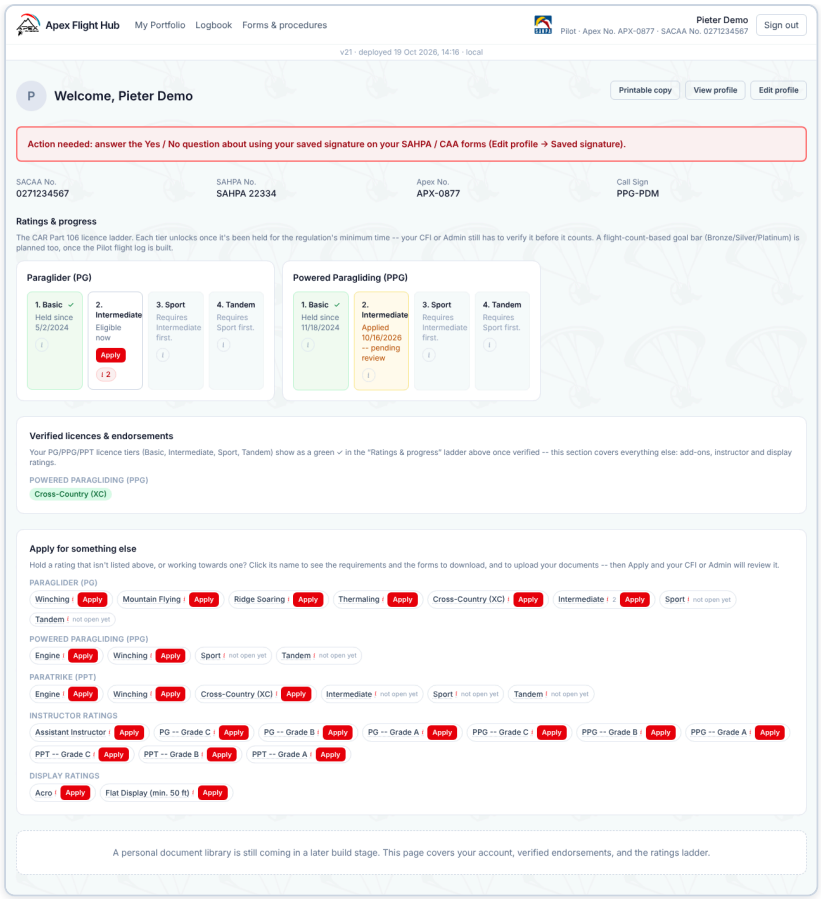

A new pilot's portfolio after the licence is submitted, with the Solo wings certificate

Ratings ladder

Ratings & progress shows the CAR Part 106 ladder for each type you fly: **Basic, Intermediate, Sport, Tandem**. A green tick shows a held tier, with **Held since** its date. A tier opens when you've held the one before it long enough:

Tier	Opens when
Intermediate	Basic held 6 months
Sport	Intermediate held 12 months
Tandem	PG Basic held 24 months and Sport held 12 months

The tier then shows **Eligible now** with an **Apply** button, or **Eligible from** a date. Your CFI or Admin verifies each application.

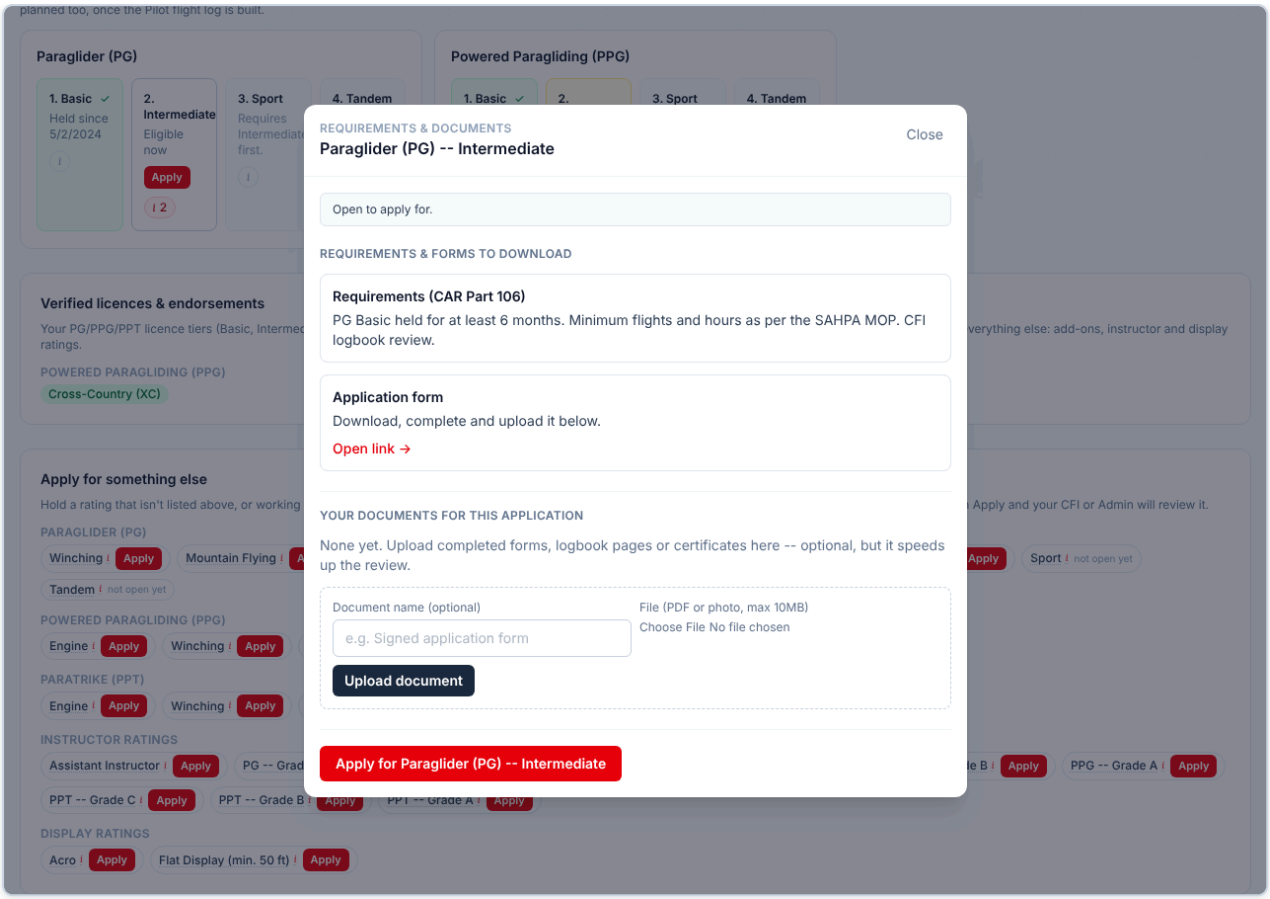

The pilot portfolio: ratings ladder, verified endorsements and Apply for something else

Requirements and applying

Click any rating's name (under **Apply for something else**, or the **i** on a ladder tier) to open its pop-up:

- where you stand: held, pending review, open to apply for, or not open yet (with the date);
- **Requirements & forms to download**, from the CFI;
- **Your documents for this application:** upload completed forms, logbook pages or certificates (PDF or photo, max 10MB). Optional, but it speeds up the review;
- **Apply** when it's open to you.

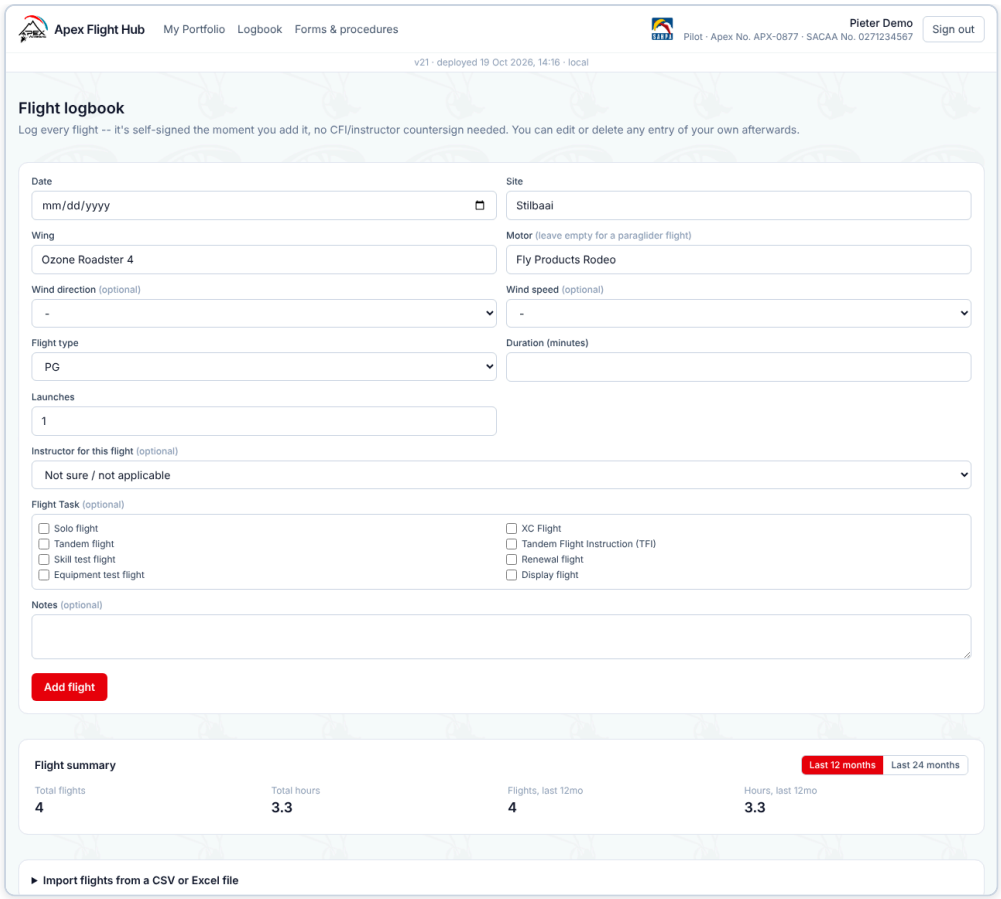

The requirements pop-up

A pending application shows in amber. A declined one shows the CFI's reason, with **Re-apply**; you also get an email.

Pilot logbook

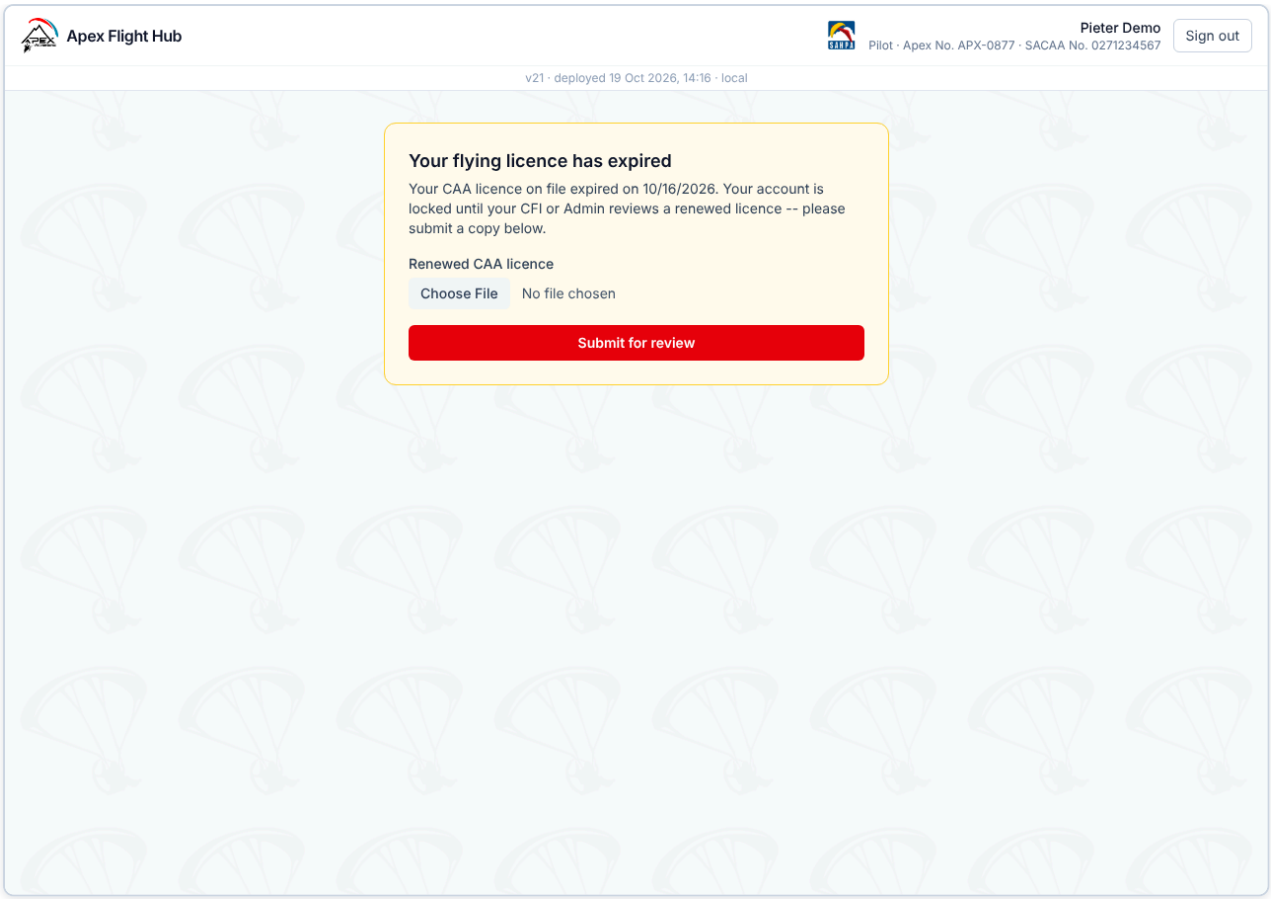

Pilots log flights the same way as students, with a **Flight Task** (Solo, XC, Tandem, TFI, Skill test, Renewal, Equipment test, Display) instead of exercises. Your flights are **self-signed**; no instructor countersign is needed. You can edit or delete your own entries.

The pilot logbook

Licence expiry

Keep your licence expiry date current under Edit profile. When your CAA licence expires, the Hub locks until you upload the renewed licence. The CFI or Admin then checks it and sets the new expiry date, which unlocks your account.

Licence expired: upload the renewed licence

11. Quick help

Problem	What to do
I signed up but can't log in	Your sign-up is waiting for approval. You get a WhatsApp when it's approved; ask the office if it takes long.
Forgot my password	**Forgot your password?** on the login page; the email link works for 1 hour. No email? Check spam, or ask the office to reset it.
The Hub only shows "enter your SAHPA number"	Join SAHPA as a student member (R440) and save your number on that page.
My flight still says Pending	Your instructor hasn't countersigned it yet. Remind them; you can't verify it yourself.
A training section is locked	Finish every exercise in the section before it. Intro students: later phases open after Phase 2 is approved.
I can't open an exam or a study note	Intro (Phase 1) students: sign up for Phase 2 on your dashboard. Otherwise the exam may not be for your course; ask the CFI.
My exam says "awaiting verification"	The CFI or an instructor still has to check it.
I'm not getting WhatsApps	Check your cell number on **Edit profile**.
My licence expired and the Hub is locked	Upload the renewed licence on the page shown; the CFI or Admin unlocks it.
A detail is wrong (name, ID, call sign, SAHPA No., course)	Only the CFI can change these; ask them.

For anything else, ask your instructor or the CFI at Apex Adventures.
